ÖSSUR OA SOLUTIONS

Enhance quality of life and mobility for people living with osteoarthritis.

These product solutions have been built on decades of experience and are designed to enhance the quality of life of people living with osteoarthritis by reducing pain and improving mobility. Through innovation leadership, OA expertise and partnerships with medical professionals, we offer comprehensive, proven and effective treatment options.

UNLOADER ONE® X

The Össur Unloader® brand name has become synonymous with osteoarthritis bracing, representing OA Solutions’ technology as the industry standard, with more than 15 clinical studies demonstrating its efficacy.

Össur strives to maintain its position as the innovation leader for OA Solutions by continuing to develop simple, yet effective clinically proven treatment solutions that increase people’s quality of life.

SPINE

ÖSSUR INJURY SOLUTIONS

For people recovering from fractures, ligament injuries or in need of post-operative treatment solutions.

These product solutions have been built on decades of experience and are designed to enhance the healing process of bone and soft tissue injuries. Through innovation leadership, proven biomechanical approaches, and partnerships with leading medical professionals, we strive to offer comprehensive and effective treatment options.

Össur Injury Solutions are globally recognised, primarily under the brand names CTi®, Rebound® and Miami®, all of which are developed to assist healing and increase people's quality of life.

Our expertise in Injury Solutions has driven us to take the next step forward by developing indication-specific products which are designed to optimise healing while maintaining function and mobility. These Functional Healing products incorporate Össur proprietary technology and are designed to enhance clinically relevant outcomes.

FUNCTIONAL HEALING –
WHERE MOBILITY
MEANS RECOVERY.

MIAMI J® CERVICAL COLLAR

Known as the superior c-spine immobiliser through multiple independent studies, the Miami J's patented design meets the specialised needs of individuals with cervical injuries. Bioengineered to minimise pressure points in key known areas: Chin, occiput, trapezius, and clavicle. Miami J offers features that enhance compliance, while providing immobilisation, inhibition of skin deterioration, and patient comfort.

INDICATIONS FOR USE

- Situations requiring gross immobilisation of the cervical spine, these may include:
- Pre and post c-spine surgery
 - C-spine precaution for trauma patients

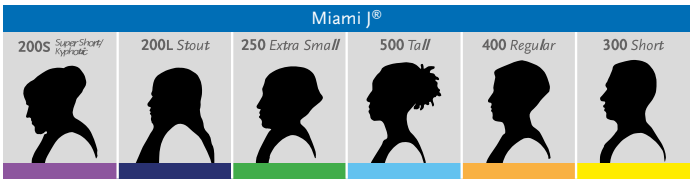

FEATURES AND BENEFITS

- Sorbatex™ padding is antibacterial and clinically proven to inhibit microbial growth, which enhances comfort and helps assure patient compliance
- Comfort adjustment buttons for occiput and sternal pad is removable when supine, lying and swallowing
- MRI, CT and X-ray lucent, MR compatible

REQUIRED MEASUREMENTS

- Sizing based on 6 phenotypes to ensure correct fit and optimum immobilisation

Phenotype-driven sizing system makes size selection simple while drastically reducing margin of error in fitting a patient. Each collar has a bioengineered front with a specific back designed to work together for superior immobilisation. For paediatric sizing, please see Miami Jr in this catalogue.

MIAMI J® CERVICAL COLLAR

ORDERING INFORMATION

MIAMI J

Size	Collar set*	Collar	Collar Back	Collar Front

MIAMI J® SELECT COLLAR

The Miami J Select cervical collar by Össur offers the widest range of height adjustability in the market with a single, universal design that replicates the comfort, immobilisation and quality you expect from a Miami J product. Featuring a patented, first-to-market locking mechanism to encourage patient compliance and anti-microbial Sorbatex padding, Miami J Select is designed to support successful patient outcomes.

INDICATIONS FOR USE

- Situations requiring gross immobilisation of the cervical spine, these may include:
- Pre and post c-spine surgery
- C-spine precaution for trauma patients

FEATURES AND BENEFITS

- Easy height adjustability with a tamper-proof locking mechanism – ‘Left to Lock’
- Anti-microbial & biocompatible Sorbatex™ padding prevents bacterial build-up
- Universal design that doesn't compromise immobilisation or comfort
- 7 precise fitting sizes with opportunity to fine-tune
- Miami J® inspired chin tray
- One-piece, anatomically inspired collar back with Flex Edge® designed to reduce occipital pressure
- Easy to don and doff with patented Reproducible Fit option
- Intuitive blue Patient Touch-Points to send patients home with confidence – Blue is You™
- Simplified comfort adjustments with integrated and patented Sternal-Relief Dial
- Large tracheal opening – improved function for ICU patients
- Easy to clean and replace multi-coloured padding
- X-ray and CT lucent, MR-safe
- Compatible with Occian™ Back & Miami JTO® accessories

MIAMI JTO® THORACIC EXTENSION

The Miami JTO Thoracic Extension is designed in conjunction with leading spine surgeons, orthotists and nurses. The orthosis is used exclusively with all Miami J® collars when even greater stability at the cervical junctions is indicated.

Miami JTO Thoracic Extension is a versatile, tool-free device with a patented chin strut, providing more control than a collar alone can provide, designed to treat cervical and high-thoracic injuries.

INDICATIONS FOR USE

- Low c-spine and high t-spine precaution for trauma patients
- Immobilisation for pre and post low c-spine and high t-spine surgery
- Other conditions requiring gross immobilisation of the low-cervical and/or high-thoracic-spine
- Conditions requiring gross immobilisation of the low cervical and/or high-thoracic-spine

FEATURES AND BENEFITS

- Patented design with ‘floating back’ permits maximum immobilisation without the risk of compensatory motion
- Snap on and off without tools
- Sorbatex™ II padding is antibacterial and clinically proven to inhibit microbial growth, which enhances comfort and helps assure patient compliance
- MRI, CT and X-ray lucent

REQUIRED MEASUREMENTS

- Universal, one size

OCCIAN® BACK

The Occian Back is designed exclusively for the specialised needs of the multi-system trauma patient in the ICU. Universally sized, specifically engineered and designed with advanced, Intuitech™ pressure-relieving memory foam, the Occian Back helps caregivers manage c-spine patients who are at high risk of occipital breakdown.

INDICATIONS FOR USE

- Patients not awake and alert within 24 - 48 hours after admission
- Patients with pre-existing skin injuries and/or lacerations to the head/neck
- Burn patients who must wear a collar
- Elective surgery patients desiring night time post-operative comfort

FEATURES AND BENEFITS

- Intuitech pressure relieving memory foam
- Maintains c-spine stability
- Provides unique pressure-relieving comfort by replacing the back section of a Miami J Collar.
- Easy to clean
- MRI, CT and X-ray lucent

REQUIRED MEASUREMENTS

- Universal, one size

MIAMI Jr®

Miami Jr is engineered to fit the unique anatomies of patients aged 12 and under. The Miami Jr line, which spans the growth cycle, is sized according to age. Össur is the only company that has a paediatric line of collars based on the anatomical differences between adults and children. We realise that children are not just “little adults” - they require innovative design.

INDICATIONS FOR USE

- Situations requiring gross immobilisation of the cervical spine, these may include:
- pre and post c-spine surgery
 - c-spine precaution for trauma patients

FEATURES AND BENEFITS

- Designed exclusively for children 12 years and under
- Sorbatex™ II pads make the collar “skin friendly” and protect skin integrity during extended wear
- MRI, CT and X-ray lucent, MR compatible

REQUIRED MEASUREMENTS

- Age

PAPOOSE®

Papoose is an innovative design for newborns up to 3 months (Broselow Gray). This true cervical spine immobiliser cradles the baby's body, securely while gently immobilising the head and spine in the proper anatomical airway and spinal alignment to help achieve optimal patient outcome while allowing for continued intimacy between caregiver and child.

INDICATIONS FOR USE

- C-Spine precaution for infants
- Immobilisation for pre and post c-spine surgery
- Other conditions requiring gross immobilisation of the infant cervical spine

PHILADELPHIA® ADJUSTABLE TRACHEOTOMY COLLAR

Philadelphia tracheotomy collars have been an industry standard for decades. Philadelphia Adjustable is constructed from the same high-quality materials as the original, and combines convenient size adjustability with immobilisation and comfort.

INDICATIONS FOR USE

Situations requiring gross immobilisation of the cervical spine, these may include:

- Pre and post c-spine surgery
- C-spine precaution for trauma patients

FEATURES AND BENEFITS

- Circumference adjustable and height adjustable with permanent lock
- Anatomically shaped Plastazote® foam leaving clearance for cervical veins
- Well ventilated and water-resistant for bathing and hydro-therapy
- MRI, CT and X-ray lucent, MR compatible

REQUIRED MEASUREMENTS

- Universal, one size

ORDERING INFORMATION

Description	Part#
Philadelphia Adjustable Tracheotomy Collar	PHP-AA

PHILADELPHIA® TRACHEOTOMY COLLAR

The Philadelphia Tracheotomy Collar is a hospital and rehabilitation collar that is designed to maintain neutral alignment of the cervical spine after injury to the neck. The collar contains a large tracheal opening, allows carotid pulse monitoring and emergency tracheotomies.

INDICATIONS FOR USE

- C-spine precaution for trauma patients
- Immobilisation for pre c-spine surgery
- Other conditions requiring gross immobilisation of the mid-cervical spine

FEATURES AND BENEFITS

- Anterior and posterior rigid plastic reinforcement supports limit movement
- Total cervical arch support maintains neutral alignment of the cervical spine
- Water-resistant for bathing and hydro-therapy
- Easily customised for individual requirements
- Does not contain natural rubber latex, non-toxic and hypoallergenic Plastazote® foam reduces skin irritation

REQUIRED MEASUREMENTS

- Neck circumference and height from tip of chin to sternal notch

MIAMI LSO®

Miami LSO is a spinal orthosis designed for pain relief, protection of injured ligaments or muscles and post-surgical immobilisation. It provides low-profile, anatomical immobilisation, easy fit and wear, options for modular support and an advanced pulley system with a length-adjustable pulley cord.

INDICATIONS FOR USE

Conditions requiring gross immobilisation of the trunk in the lumbar region such as:

- Stable non-displaced spinal fractures (L1-L5)
- Spinal Stenosis
- Herniated Disks
- Degenerative Spinal Pathologies
- Spondylolysis
- Spondylolisthesis

FEATURES AND BENEFITS

- Slim, breathable material
- Proven Miami double-pulley system with length-adjustable pulley cord
- Intuitive fitting without trimming with fold-over belt arms & Precise-Size™ landmarks
- Optional fit tool for perfect fitting directly on the patient
- Universal belt sizing accommodates waists up to 178cm/70"
- New Universal Posterior panel to accommodate more patients with less inventory
- Contoured posterior panels sized S-XL for a precise, anatomical fit
- Quick-Fit pocket enclosure and blue highlights for patient ease of use

REQUIRED MEASUREMENTS

- Waist circumference

MIAMI TLSO 464

The Miami TLSO from Össur directly addresses the needs of patients and practitioners, simplifying preparation without compromising on fit or performance. This easy-to-use pre-assembled Miami TLSO brace offers three configurations in one.

Compliance: Easily applied in over the shoulder or underarm configuration, donning and doffing is further simplified with the conveniently located quick release buckles.

Adjustability: The universal belt designs allows for setting the belt length on the patient for a more accurate sizing experience.

Comfort: Truly shaped to fit the anatomy, the anatomically contoured design better immobilises the spine while maximizing patient comfort.

Ease of Use: The Miami TLSO brace requires minimal preparation and is designed to provide optimal patient comfort.

INDICATIONS FOR USE

Conditions requiring gross immobilisation of the thoracic and lumbar spine. Such conditions may include:

- Post-surgical immobilisation
- Spinal support TLSO attachment is up to T7
- Spinal stenosis
- Herniated disc
- Degenerative spinal fractures
- Spondylolithesis
- Spondylolysis

CONTRAINDICATIONS

- Unstable, displaced fractures

FEATURES AND BENEFITS

- Significantly superior comfort and ease of donning/doffing
- Fully assembled for fitting with ease
- Accommodates heights 155-193 cm (5'1" – 6'5")
- Posterior thoracic extension option with ergonomic axillary strapping
- Step-down to an LSO as one progresses through rehabilitation
- One-touch telescoping anterior-thoracic extension option with single or double-hinge
- The convenience of a one-size Universal or individualise with a uniquely-sized anatomical design
- Improve comfort and immobilisation with multiple strapping configurations and removable anchors

REQUIRED MEASUREMENTS

- Waist circumference

MIAMI TLSO 456

The Miami TLSO 456 from Össur directly addresses the needs of patients and practitioners, simplifying preparation without compromising on fit or performance. This easy-to-use pre-assembled Miami TLSO brace offers the convenience of a one-size Universal or a uniquely-sized anatomical design.

Compliance: Blue is You™ patient touch-points help send patients home with confidence.

Adjustability: The universal belt design allows for setting the belt length on the patient for a more accurate sizing experience. Heat moldable posterior panels allow a customised fit, while the modular design allows step-down support to an LSO.

Comfort: Featuring the Miami LSO™ Advanced Compression pulley system with lumbar compression you can feel, and an anatomically contoured design that better immobilises the spine while maximising patient comfort.

Ease of Use: Easily applied with over-the-shoulder straps, the Miami TLSO brace requires minimal preparation and is designed to provide optimal patient comfort.

INDICATIONS FOR USE

Conditions requiring gross immobilisation of the thoracic and lumbar spine. Such conditions may include:

MIAMI LUMBAR® POSTEO

Designed with patient comfort and compliance in mind, the Miami Lumbar Posteo provides functional relief of vertebral fracture pain, and facilitates return to mobility. The lumbar compression system offers both pain relief via active vertebral offloading and better grip of patient's hips for greater ease of use and compliance. The Miami Lumbar Posteo includes an innovative approach to ease of use and consistent donning.

INDICATIONS FOR USE

- Back pain caused by stable vertebral compression fractures (VCF)
- Post-operative immobilisation

FEATURES AND BENEFITS

- Active offloading via thoracic extension and lumbar compression
- Integrated pulley system for customised fit
- Trimmable axillary straps with adjustable tension for optimal stabilisation
- Cold-moldable aluminum PTE to fit different anatomies
- Extra cushioning around the aluminum strut for minimised skin pressure

REQUIRED MEASUREMENTS

- Back length measured from the top of the sacrum up to C7 vertebrae, following the spinal curvature

SIZING

Please note that the Miami Lumbar Posteo includes a universal lumbar belt which can be trimmed down to the appropriate size.

FORMFIT® PRO BACK

Össur Formfit® Pro Back provides relief for patients suffering from pains and strains in the lower back. Manufactured with our dynamic, 3D-Motion Tech™ knitting technology, our belts feature superior moisture wicking capabilities and are highly breathable. The patented back panel design utilises our StayBilizer™ technology to provide optimum shape and fit, while conveniently placed finger loops make donning easy. The SmartPad™ provides a targeted support and cushioning and can be removed if desired.

MotionTech™

CoolVent™

StayBilizer™

SmartPad™

INDICATIONS FOR USE

- For lower back conditions that may benefit from compression and gross motion restriction, such as:
- Lower back pain (Lumbago)
- Lumbosacral sprain/strain
- Degenerative joint/disc disease

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- MotionTech™ for compression and dynamic fit
- Removable lumbar SmartPad™ for targeted support and cushioning
- Lightweight, malleable aluminum stays are shaped to the anatomy of the lower back

REQUIRED MEASUREMENTS

- Measure waist circumference

FORMFIT® BACK SUPPORT AIR

The Form Fit Back Support with Air provides compression and support for those suffering from lower back pain. The integrated pneumatic system is intuitive and conveniently located so that adjustments can be made as demands on the body change throughout the day. The double wrap design improves compression, while durable finger loops make applying the brace easy. Made from breathable materials, the Form Fit Back Support provides compression and support for those suffering from lower back pain. The double wrap design improves compression, while the durable finger loops make applying the brace easy.

INDICATIONS FOR USE

- Lower back conditions that may benefit from gross motion restriction, such as;
- Muscular low back pain
 - Lumbosacral trains
 - Chronic low back pain
 - Sciatica

FEATURES AND BENEFITS

- Self-contained pneumatic system is low-profile and easy to use
- Mesh panels and ventilation holes increase breathability and enhance comfort
- Overlapping double pull strap design provides additional support to the lumbar and abdominal areas
- Flexible stays provide optimum support in the lumbar and abdominal areas
- Gripper strips prevent migration
- Adjustable air bladder provides a custom fit and offers focused compression in the lumbar area

REQUIRED MEASUREMENTS

- Waist circumference

INNOVATOR X® POST-OP ELBOW BRACE

Benefiting from our proven, patented technologies, Innovator X, with extending struts, can help improve patient outcomes. With superior comfort, clean aesthetics and the most user-friendly hinge in post-op bracing, Innovator X is designed to increase patient satisfaction and compliance.

INDICATIONS FOR USE

- Indications requiring elbow immobilisation and/or range of motion restriction. This may include:
- Stable fractures of the elbow, distal humerus, proximal radius or ulna
- Tendon and ligament injuries or repairs
- Collateral ligament reconstructions
- Elbow hyperextension
- Triceps tendon repair
- Chronic elbow injuries
- Tennis elbow release

FEATURES AND BENEFITS

- OneTouch™ easy to adjust ROM hinge
- Slide-to-Size™ struts lead to a more customised fit
- Sensil® silicone padding on the strapping system reduces slipping and malleable aluminium cuffs allow for customisation
- Patented Form Fit® 3-dimensional padding and lycra lining provide superior comfort and compliance
- Comfort pad at the neck and shoulder
- Optional anti-supination/pronation arm bar kit is available

REQUIRED MEASUREMENTS

- Universal, one size

FORMFIT® SHOULDER BRACE

The Formfit Shoulder Brace is designed to provide immobilisation following shoulder injury/surgery. With its streamlined fit, sporty look and breathability it offers excellent comfort and ease of use. Same as its predecessor, the SmartSling®, the Formfit Shoulder Brace also provides abduction of the shoulder (when the abduction pillow is attached), or external rotation of the shoulder (when the external rotation pillow is attached).

Optional axilla pillow helps distribute weight over a larger surface area.

INDICATIONS FOR USE

- Immobilisation for rotator cuff repairs
- Bankart repairs
- Capsular shifts
- Glenohumeral dislocations/subluxations
- Soft tissue repairs/strains
- Shoulder instabilities/injuries
- Post-surgical rehabilitation

FEATURES AND BENEFITS

- Breathable material
- Quick-release buckles
- Offloading strap
- Extra padding
- Universal thumb loop

REQUIRED MEASUREMENTS

- Olecranon to end of closed fist

FORMFIT® PRO ELBOW

Formfit® Pro Elbow provides relief from elbow pain. This 3D compressive elbow sleeve is manufactured using our MotionTech™ technology and features two integrated epicondyle SmartPads™ for more targeted support and cushioning. The RadialStrap™ provides additional compression and support.

MotionTech™

CoolVent™

SmartPad™

FoldLock™

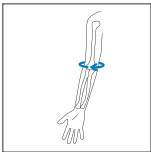

INDICATIONS FOR USE

- For elbow conditions that may benefit from compression, such as:
- Medial and lateral epicondylitis
- Elbow pain and swelling

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

REQUIRED MEASUREMENTS

Measure arm circumference exactly at the elbow. Elbow in full extension.

ORDERING INFORMATION

Description	Size	Part#
AirForm Tennis Elbow Support	Universal (fits elbow circumference 8-14"/20 - 36 cm)	320000

FORMFIT® TENNIS ELBOW SUPPORT

Formfit Tennis Elbow is made with a patented, ergonomically-shaped plastic. There are two blue cushions with ribbed surface on each side that reduce traction on the tendons. The durable design and materials enable everyday use for both work and athletic activities.

INDICATIONS FOR USE

- Tendonitis of the elbow
- Prevention during work, daily life and sport
- Epicondylitis

FEATURES AND BENEFITS

- Adjustable strap
- Patented ergonomically-shaped plastic eliminates tourniquet effect associated with traditional designs.
- Twin blue cushions provide counterforce, reducing traction on the tendons and thus inflammation
- Ribbed surfaces reduce vibration to the tendon, increasing comfort
- Durable design and materials enable everyday use for both work and athletic activities

REQUIRED MEASUREMENTS

- Circumference of the elbow

ORDERING INFORMATION

Size	Circumference	Part#
Small	22-26cm	B-247000002
Medium	27-32cm	B-247000003
Large	33-38cm	B-247000004

EXOFORM® CARPAL TUNNEL WRIST

INDICATIONS FOR USE

- Carpal tunnel syndrome
- Tendonitis

FEATURES AND BENEFITS

- Lightweight low profile design
- 20% less circumferential bulk than other brands
- More room at base of the thumb, palmar crease and 5th MP for full MP flexion
- Contoured for an anatomically correct fit
- Designed to provide smooth controlled resistance to extreme range of motion
- Preshaped into a neutral position for comfortable limited motion/ flexibility
- Provides radial and ulnar styloid relief
- “Soft touch” web space is cushioned and 40% thinner than other brands
- Interior is 3-dimensionally molded to enhance comfort

REQUIRED MEASUREMENTS

- Wrist and palm circumference

ORDERING INFORMATION

FORMFIT® PRO WRIST

Formfit Pro Wrist is constructed using our superior signature 3D MotionTech knit, and ideal for injuries that may benefit from compression. Malleable aluminum stays can be adjusted to conform to an individual's anatomy. CoolVent™ technology in the basal thumb area enhances breathability and comfort.

MotionTech™

CoolVent™

StayBilizer™

FoldLock™

INDICATIONS FOR USE

- For wrist conditions that may benefit from compression, such as:
- Rheumatoid Arthritis (RA) and other chronic pain conditions
- Wrist sprain and strains
- Overuse and pain conditions
- Wrist tendonitis

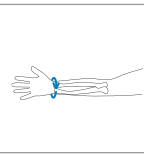

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- MotionTech™ for compression and dynamic fit has been proven to be superior to the leading brands at moisture wicking and breathability, keeping patients cool during wear
- Malleable aluminum stay for a customised fit
- CoolVent™ technology in thumb base area for extra breathability and comfort

REQUIRED MEASUREMENTS

Measure wrist circumference at the level of the radial styloid with the hand outstretched. Wrist in 0 degrees of flexion.

HIP..... 40

REBOUND® HIP..... 42

UNLOADER® HIP 44

REBOUND® HIP

Rebound Hip delivers gentle controlling forces and effective functional ROM restriction in extension / flexion and abduction / adduction to promote optimal post-surgical outcomes. The low profile, lightweight design supports patient comfort and compliance. The universal frame and softgood are easy to stock, assemble and quickly fit.

INDICATIONS FOR USE

Hip conditions that could benefit from motion restriction such as:

- Postoperative after (total) hip arthroplasty
- Postoperative after revision of (total) hip arthroplasty
- Postoperative hip arthroscopy
- Post-op following FAI arthroscopic surgery
- Post-op following gluteus medius repair surgery
- Post-op following hamstring repair surgery
- Inoperable hip abnormalities
- Preventively when there is risk of hip dislocation
- Conventional treatment after dislocation/reduction

FEATURES AND BENEFITS

- Low-profile, lightweight design that supports patient comfort and compliance
- Quick-release pegs easily adjust the desired range-of-motion needed for the patient's optimal rehab
- Quick-fit with sliding mechanism on frame to adjust for patient's height
- Optional, adjustable ROM hinge enables adduction/abduction from 0° to 10°, 20° or 30°
- OR kit offers patient protection of ankle and perineum skin during intraoperative traction on a surgical table

REQUIRED MEASUREMENTS

- Circumference at iliac crest height
- Length from greater trochanter to mid patella

UNLOADER® HIP

Unloader Hip is designed to improve activities of daily living by optimizing load dispersion for patients suffering from mild and moderate osteoarthritis of the hip, thus contributing to hip stability and improved mobility.

Unloader Hip delivers proprioceptive support during the gait cycle by providing compression with a proven pully system design. If required it can decrease the internal rotation and adduction moment with its unique and clinically proven Dynamic Rotation Straps™.

INDICATIONS FOR USE

- Mild and moderate osteoarthritis of the hip
- Conditions benefitting from repositioning of the hip and/or compression around the greater trochanters

FEATURES AND BENEFITS

- The Dynamic Rotation Straps with SmartDosing dial allows individual adjustment of the external rotation force, to achieve optimum pain relief for each patient
- Easy donning and doffing thanks to pocket wrap closure system and zipper
- Pulley system for improved stability
- Premium quality Lycra® for breathability and a snug fit

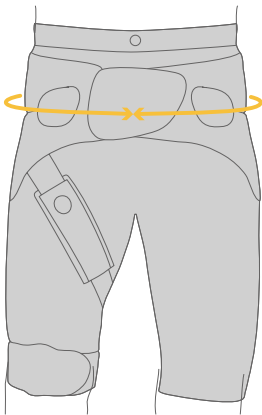

REQUIRED MEASUREMENTS

- Measure the hip circumference at the anterior superior iliac-spine.

CTi® CUSTOM

CTi braces provide the ultimate combination of stabilisation and protection of the knee joint. This truly custom made brace, with rock-solid CTi carbon frame, uses Accutrac® hinges with extension stops to glide with the knee and breathable liners coated with bio-inert Sensil® silicone to ensure the CTi remains properly positioned on the leg, for optimal functional benefit. CTi custom braces are available in different models and can be further customised with a variety of options, colours, designs and accessories.

INDICATIONS FOR USE

For knee conditions that may benefit from increased AP and ML stability around the knee, such as: ACL, MCL, LCL, PCL, rotary and combined instabilities

FEATURES AND BENEFITS

- Reversible field-serviceable d-rings and trimmable straps facilitate fast adjustments and customised fit (optional)
- Corrosion resistant materials, ideal for water sports
- Anatomically-correct Accutrac® hinges with extension stops
- Proprietary Sensil® silicone liners designed to reduce migration
- Available in 3 different models: Standard model for moderate to high impact levels, Pro Sport model for the highest impact levels and Vapor model for low to moderate impact levels

SMARTMEASURE®

A digital measuring system for custom knee braces on the iPhone or iPad. The most intuitive, efficient and accurate way to measure for any Össur custom knee brace, including the CTi. Utilises a section-based, step-by-step approach to guide you through the entire brace selection, measuring and order process.

DIGITAL MEASUREMENT SYSTEM (DMS)

This system simply requires minimal physical measurements and two digital photos, which can then be sent to customer service. This system is a quick, easy and reliable method of measuring for a CTi without the need for training.

Please contact customer care for a free DMS Kit. Item number - 89100

CTI® OTS

The proven technology of the CTi knee brace is available with off-the-shelf convenience, providing adjustability and an excellent out-of-the-box fit while maintaining the level of support and protection that you expect from a CTi knee brace.

Outfitted with anatomically-correct Accutrac® hinges and flexible subshells and d-rings, the rock-solid CTi carbon frame provides a rigid exoskeleton that stabilises the knee joint. Breathable liners coated with bio-inert Össur Sensil® Silicone ensure CTi OTS remains properly positioned on the leg, for optimal functional benefit.

INDICATIONS FOR USE

- ACL, MCL, LCL, PCL, rotary and combined instabilities

FEATURES AND BENEFITS

- Anatomically-correct Accutrac hinges with extension stops to glide with the knee
- Flexible subshell and Adjustable Tibial Strap capture the tibia and allow adjustments in hinge depth for a more customised fit
- Breathable liners coated with bio-inert Össur Sensil Silicone to reduce migration and skin irritation
- Total Support System™ for ACL, MCL, LCL, PCL, rotary and combined instabilities
- Corrosion resistant materials, ideal for water sports
- Available in 2 models: Standard model for moderate to high impact levels, Pro Sport model for the highest impact levels

REQUIRED MEASUREMENTS

- Caliper measurement: Medio-laterally at joint width in a standard, weight-bearing position
- Circumference: Just below the distal border of the patella

CTI® OTS

CTi® OA

CTi braces provide the ultimate combination of stabilisation and protection of the knee joint. CTi uses Accutrac® hinges with extension stops to glide with the knee and breathable liners coated with bio-inert Sensil® silicone to ensure the CTi remains properly positioned on the leg, for optimal functional benefit. Allowing for varus or valgus correction, the custom made CTi OA is an excellent, dual hinged hybrid OA and ligament knee brace for your more active patients.

INDICATIONS FOR USE

- For knee conditions that may benefit from increased A-P and M-L stability around the knee, such as: ACL, MCL, LCL, PCL, rotary and combined instabilities
- Also treats mild to severe unicompartmental osteoarthritis

FEATURES AND BENEFITS

- Reversible field-serviceable d-rings and trimmable straps facilitate fast adjustments and customised fit
- Corrosion resistant materials, ideal for water sports
- Anatomically-correct Accutrac® hinges with extension stops
- Proprietary Sensil® silicone liners designed to reduce migration

REQUIRED MEASUREMENTS

- Custom-to-measurement
- 5 point knee measurement (Smartmeasure)

CTi® OA

ORDERING INFORMATION

CTi OA

Description	Left	Right
CTi OA	B-116630010	B-116530010

For accessories see CTi Custom.

SMARTMEASURE®

A digital measuring system for custom knee braces on the iPhone or iPad. The most intuitive, efficient and accurate way to measure for any Össur custom knee brace, including the CTi OA. Utilises a section-based, step-by-step approach to guide you through the entire brace selection, measuring and order process.

DIGITAL MEASUREMENT SYSTEM (DMS)

This system simply requires minimal physical measurements and two digital photos, which can then be sent to customer service. This system is a quick, easy and reliable method of measuring for a CTi OA without the need for training.

Please contact customer care for a free DMS Kit. Item number - 89100

C180™ ROCKET

With a condensed size and Accutrac™ hinges that are modified to more accurately track young knees, the lightweight C180 Rocket provides support for children with ligament instabilities.

INDICATIONS FOR USE

- For knee conditions that may benefit from increased AP and ML stability around the knee, such as: ACL, MCL, LCL, PCL, rotary and combined instabilities

FEATURES AND BENEFITS

- Anatomically-correct Accutrac® hinges with easy-to-use extension stops
- Semi-rigid frame consisting of woven carbon fibre infused with acrylic resin, is heat-mouldable for customisation

REQUIRED MEASUREMENTS

- Caliper measurement: Medio-laterally at joint width in a standard, weight-bearing position
- Circumference: Just below the distal border of the patella

REBOUND® PCL

The PCL, compared to the ACL, has the intrinsic ability to heal and regain continuity after an injury. The PCL experiences variable tensile forces during knee flexion. Insufficient healing after a PCL rupture leads to significant pathologies, such as, chronic anterior knee pain or knee OA. Healing of the PCL in an elongated position can lead to chronic instability and disability. Therefore, physiologically correct positioning of the PCL during conservative or post-surgical rehabilitation is important. The Rebound PCL is the world's First Dynamic Force PCL Brace. It applies a physiologically correct dynamic force to the PCL during rehabilitation.

The dynamic load on the tibia is generated by applying an anterior directed dynamic force on the calf area, and opposing counter forces on the anterior aspect of the leg.

FUNCTIONAL HEALING - WHERE MOBILITY MEANS RECOVERY

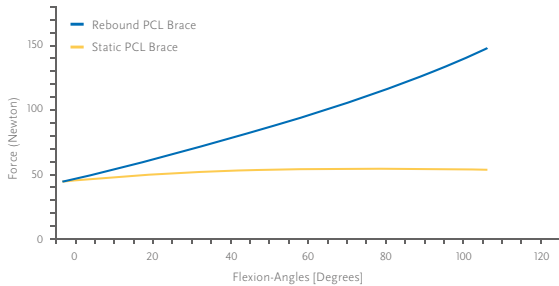

INDICATIONS FOR USE

- Non-surgical treatment of PCL ruptures

Post-surgical rehabilitation for:

- Partial PCL tears
- PCL reconstruction / augmentation
- PCL revision

LaPrade RF, Smith SD, Wilson KJ, Wijdicks CA. Quantification of functional brace forces for posterior cruciate ligament injuries on the knee joint: an in vivo investigation. Knee Surg Sports Traumatol Arthrosc [Internet]. 2014 Aug 22 [cited 2014 Dec 11]; Available from: <http://www.ncbi.nlm.nih.gov/pubmed/25145947>

FEATURES AND BENEFITS

- Dynamic Tension System (DTS) is designed to increase the load on the tibia as the knee goes through flexion, providing an anterior drawer force necessary to decrease load on the healing PCL to allow it to heal
- 3 options to customise the biomechanically correct posterior tibial load for each patient by using shear knobs. And having the possibility to re-adjust the posterior tibial load, e.g. in case of swelling.
- Polycentric hinge with extension and flexion stops allowing for range of motion adjustment.
- Lightweight brace with proprietary Sensil® silicone calf liner and doeskin thigh liner reduce migration while providing comfort to the patient
- Moulded posterior frame for optimised fit and support, with open anterior for ease of donning/doffing
- Available in 12 colours

REQUIRED MEASUREMENTS

- Circumference 15cm above mid patella
- Circumference 15cm below mid patella
- Medio/lateral width of the knee using a Constant Force (CF) caliper (Contact Customer Care if you require a CF caliper)
- Custom- made to measure version also available

REBOUND® ACL

The Rebound ACL brace is an evolution in bracing, designed to comfortably apply an anatomically correct, dynamic load to the anterior cruciate ligament (ACL). Whether during conservative or surgical management, the Rebound ACL compliments protocols and supports an optimal biomechanical joint environment as a foundation for long-term successful patient outcomes. Innovative technology in the Dynamic Tension System® (DTS) allows individualized, adjustable settings to reduce strain on the healing ACL.

INDICATIONS FOR USE

INDICATIONS

Conditions benefiting from an agonistic force that varies throughout flexion in proportion to ACL tension applied to the thigh and calf in the sagittal plane. These may include:

- Anterior cruciate ligament (ACL) injury
- Reconstruction
- Non-surgical treatment.

CONTRAINDICATIONS

None known

INTENDED USE

Post-injury, post-surgery, and conservative rehabilitation.

TARGET GROUP

Patients requiring a dynamic knee orthosis who have suffered an ACL or combined instability, and are being treated post-injury with conservative or post-surgical management.

FEATURES AND BENEFITS

- Dynamic technology for knee stability, with a Dynamic Tension System™ that provides an agonistic, dynamic force to the ACL that is flexion-angle dependent (LaPrade et al., 2017) and designed to reduce anterior-drawer, promoting knee stability.
- Specific load adaptation according to the patient's individual anatomy and rehabilitation requirements
- Supported by clinical & biomechanical studies, the Rebound ACL is shown to reduce strain on the ACL during activity and significantly reduce strain on the meniscus in ACL-deficient knees (Tomescu et al.,2017).
- Biocompatible, hi-tech materials including Blue is You™ patient touch points & ActiveGrip™ liners promote suspension & comfort
- Lightweight, aircraft aluminum frame
- Available in sizes SM-XL
- Flexion & extension range-of-motion lock-outs
- Posterior frame optimized for fit and support, with open anterior for ease of donning/doffing
- Clinically-tested comfort, validated by end-users and with load mapping data collected during rehabilitation activities, the Rebound® Dynamic Tension System (DTS) provides a comfortable load to the posterior thigh & anterior tibia.

REBOUND® ACL

REQUIRED MEASUREMENTS

Measure knee caliper medio-laterally at joint width in standing, weight-bearing position.

Measure calf circumference 15 cm (6") below mid-patella. Leg in extension.

Measure thigh circumference 15 cm (6") above mid-patella. Leg in extension.

REBOUND® CARTILAGE BRACE

Cartilage and meniscal injuries usually lead to significant limitations of knee function and knee pain. As surgery cannot be done on the day of diagnosis, prehabilitation is indicated to limit knee pain and keep the patient functional until surgery is scheduled. In addition, post-operatively, the success of meniscal tear and articular cartilage repair is dependent upon patient compliance during the rehabilitation process and the protocol is based on restricted weight bearing combined with gradual increase in activity. Many rehabilitation protocols suggest partial weight-bearing as the standard of care for successful outcomes. However, patient compliance to partial weight-bearing instructions with crutches has been shown to be inconsistent.

Rebound Cartilage is a protective functional solution designed for prehabilitation / pre-surgical management and rehabilitation of cartilage injuries and meniscal lesions. By protecting the healing tissue from overload, it fits into accelerated rehab protocols.

FUNCTIONAL HEALING - WHERE MOBILITY MEANS RECOVERY

INDICATIONS FOR USE

- Articular cartilage defect repair needing unicompartmental load reduction or range of movement restriction
- Cartilage knee trauma benefiting from unloading or movement restriction
- Meniscal repair
- Avascular necrosis
- Condylar bone marrow lesions (bone bruises)
- Tibial plateau fractures
- May also be beneficial for other unicompartmental knee conditions that require unloading

FEATURES AND BENEFITS

- Dual Cartilage Protection Straps™ (CPS) maintain joint unloading in flexion for protection of the cartilage during the healing process
- Breathable wrap around sleeve integrated with Sensil® silicone coated calf liners and doeskin thigh liners provide increased comfort while ensuring adequate suspension
- Colour coded Quick Fit buckles enable easy application and removal
- Optional modular Flexion Control kit when needed per prescribed rehab protocol for range of movement restriction.

REQUIRED MEASUREMENTS

- Circumference measurement: 15cm below mid-patella

UNLOADER ONE® X

Unloader One X improves mobility by providing pain relief from knee osteoarthritis and degenerative meniscal tears. It features Össur's unique patented and clinically proven 3-point Leverage System that generates unicompartmental unloading of the knee joint.

INDICATIONS FOR USE

- Moderate to severe unicompartmental knee osteoarthritis
- Degenerative meniscal tears
- Other knee conditions that may benefit from unicompartmental unloading

FEATURES AND BENEFITS

- 3-Point Leverage System consisting of two Dynamic Force System (DFS) Straps, rigid shells and a single upright hinge contribute to a unicompartmental unloading of the knee joint.
- The unloading is effective only when needed, no condyle pressure during sitting or swing phase.
- A slender perforated frame with soft edges, contours easily to individual anatomies and remains discreet whether worn over or under clothing.
- Skin friendly liners and pads as well as a smooth inner surface of shells reduce probability of pressure points.
- The gastroc strap is positioned over thickest part of calf to help prevent migration.
- Tool-free SmartDosing® dials enable the patient to be in control of their pain level by fine-tuning the strap tension.
- Color coded touchpoints and Quick-Fit buckles increase user-friendliness.
- Alignment guide on hinge facilitates correct positioning on the leg.
- Entire brace is machine washable (washbag included with product).
- Easily adaptable to individual needs and anatomical shapes.
- Field serviceable.

UNLOADER ONE® CUSTOM

SMARTMEASURE®

A digital measuring system for custom knee braces on the iPhone or iPad. The most intuitive, efficient and accurate way to measure for any Össur custom knee brace, including the Unloader One. Utilizes a section-based, step-by-step approach to guide you through the entire brace selection, measuring and order process.

DIGITAL MEASUREMENT SYSTEM (DMS)

This system requires minimal physical measurements and two digital photos, which can then be sent to customer service. This system is a quick, easy and reliable method of measuring for an Unloader One Custom without the need for training.

FORMFIT® PRO KNEE OA

Össur Formfit® Pro Knee OA is a unique, compressive knee sleeve with a Dynamic Force Strap system, designed to provide pain relief from the early stages of osteoarthritis (OA). The dynamic, 3-D MotionTech™ knit is supportive and meets certified medical grade compression requirements, and has been proven to be superior to the leading brands at moisture wicking and breathability, keeping your knee cool during wear. CoolVent™ technology in the popliteal area enhances breathability and comfort, while the distinct patella graphics help with intuitive placing of the sleeve. The integrated StayBilizer™ hinge, constructed from lightweight, flexible EVA material, is suitable for sports, such as football.

MotionTech™

CoolVent™

StayBilizer™

FoldLock™

INDICATIONS FOR USE

For osteoarthritis and other knee conditions which may benefit from unloading and/or compression, such as:

- Medial or lateral knee pain
- Early or mild unicompartmental osteoarthritis of the knee
- Symptomatic, unicompartmental meniscus degeneration

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- Patented DFS system.
- Certified medical grade compression (20-30 mmHg).
- Lightweight CoolVent™ knit in popliteal area for added breathability and comfort.
- Patented FoldLock™ system for easier and more secure application.
- Sports-compatible StayBilizer™ hinge made from light, flexible EVA material for optimum shape and fit.
- Patella graphics for intuitive placement.
- Available in 5 standard sizes and 3 comfort sizes.

FORMFIT® KNEE MCL

The Formfit Knee MCL provides external stability and protection for low to medium contact/impact activities and while recovering from injury. A unique, single hinged, hybrid wrap/sleeve design sets this brace apart from the competition. The lateral, range of motion hinge keeps the medial side free of obstruction. The Dynamic Force Strap aids in the resistance of valgus forces during knee extension, while the adjustable tibial strap improves suspension by minimising slippage.

INDICATIONS FOR USE

- Mild to Moderate Medial Collateral Ligament (MCL) sprains (Grade I and Grade II)

FEATURES AND BENEFITS

- Single, steel ROM lateral hinge (0° or 20° extension stop, 70° flexion stop)
- Dynamic Force Strap resist valgus forces
- Hybrid wrap/sleeve for easy application
- Adjustable tibial strap for improved suspension

REQUIRED MEASUREMENTS

- Knee circumference at mid-patella

REBOUND® POST-OP

The simple, versatile post-operative knee bracing solution that is easy for everyone. Whether adjusting ROM, setting the drop lock, or altering the brace length, you'll appreciate the simplicity of the Rebound Post-op knee brace.

INDICATIONS FOR USE

- ACL, PCL, MCL, LCL repairs/injuries
- Meniscal repairs
- Tibial plateau fractures
- Patellar tendon repairs
- Osteochondral repairs
- Condylar fractures
- Sprains/strains of the knee
- HTOs (High Tibial Osteotomy)

FEATURES AND BENEFITS

- Tool-free design and multi-purpose Smart-Fit™ packaging
- Available in universal, left or right contour and paediatric
- Telescoping frame from 47cm-68cm (Adult) and 39.5cm - 54cm (paediatric)
- OneTouch™ easy to adjust ROM hinge with lock-out capability
- Colour-coding and numbered frame for patient education
- Quick-fit, gripping buckles for easy application

REQUIRED MEASUREMENTS

- Circumference: 6" (15cm) above mid-patella

REBOUND® KNEE BRACE

With six variations to choose from the Rebound hinged knee brace product line is a comprehensive portfolio of high-quality braces designed to serve the needs of a broad range of patients.

INDICATIONS FOR USE

- ROM Hinge Models: Mild to moderate ACL and / or PCL,MCL and LCL instabilities, sprains and strains
- Non-ROM Hinge Models: Mild medial / lateral knee instabilities

FEATURES AND BENEFITS

- Highly breathable aerospacer material that reduces heat retention and improves comfort
- Low profile hinges with extension and flexion stop kit options (ROM version) and malleable arms to provide a custom fit and knee movement control
- Contoured pre-tensed inset fabric that reduces irritation and material bulging in the popliteal area as well as inventory
- Removable straps allow application from right or left side and strap pull tab allow for consistent donning by patient
- Universal buttresses are included with all sleeve versions for customisable patella support

REQUIRED MEASUREMENTS

- Circumference: 15cm above mid-patella

FORMFIT® PRO KNEE

Össur Formfit® Pro Knee is a compressive knee sleeve that features a SmartPad™ buttress for targeted support and cushioning. Our patented design realigns the patella, suitable for conditions such as Patella Tendonitis (Jumper's Knee) and Chondromalacia Patella. The dynamic, 3-D MotionTech™ knit is supportive, meets certified medical grade compression requirements and has been proven to be superior to the leading brands at moisture wicking and breathability, keeping your knee cool during wear. Lightweight, removable spiral stays ensure optimum shape and fit, while distinct patella graphics make donning intuitive.

MotionTech™

CoolVent™

StayBilizer™

SmartPad™

INDICATIONS FOR USE

For knee conditions that may benefit from compression, such as;

- Patella tendonitis
- Chondromalacia Patella
- Mild sprains and strains
- Knee pain
- Feeling of instability

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

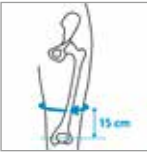

FEATURES AND BENEFITS

- MotionTech™ for compression and dynamic fit with superior moisture wicking and breathability, keeping your knee cool during wear
- Certified medical grade compression (20-30 mmHg)
- Lightweight CoolVent™ knit in popliteal area for added breathability and comfort
- Patented SmartPad™ for targeted support and cushioning
- Patella graphics for intuitive placement
- Patented FoldLock™ system for easier and more secure application
- Lightweight, removable spiral steel stays

FORMFIT® TRACKER

The Formfit® Tracker with micro-adjustable ReflexWing™ buttress realigns the patella, providing dynamic lateral support for common patella conditions. Its FlyWeight™ fabric delivers lightweight breathability and a low-profile design that feels great against the skin and minimizes migration. PowerLock™ straps work in tandem with heat moldable CustomFit™ hinges to provide a customizable fit for your patient.

INDICATIONS FOR USE

For knee conditions that may benefit from realignment of the patella and/or patients that would benefit from an added lateral support of the patella, such as:

- lateral patellar subluxation or dislocation
- lateral maltracking

FEATURES AND BENEFITS

- CustomFit™ hinges for customized fit and support
- Anti-Migration Tech™ minimizes migration
- PowerLock™ straps for secure lateral support
- ReflexWing™ buttress for comfortable patella realignment
- FlyWeight™ fabric for soft feel and breathability
- Durable and machine washable

FORMFIT® KNEE ROM BRACE

INDICATIONS FOR USE

- Mild to moderate ACL and PCL tears
- MCL and LCL tears
- Combined mild knee sprains and strains
- Instabilities of the knee

FEATURES AND BENEFITS

- With 6 options to choose from, you can confidently meet the unique needs of any patient
- When you need to limit range-of-motion, our ROM hinge provides the control you need. When you don't, you can opt for a more streamlined, polycentric hinge
- ROM braces available in 12" or 16" Length
- A removable, universal buttress is included with every sleeve version of the Formfit Knee Brace for additional, customisable patella support, if necessary

REQUIRED MEASUREMENTS

- Knee circumference at mid-patella

NEOPRENE HINGED KNEE SUPPORT

INDICATIONS FOR USE

For patients suffering from knee conditions that may benefit from additional knee support, such as:

- Patellar tendonitis
- Subluxation dislocation
- Post-operation rehabilitation
- Post arthroscopic surgery
- Chondromalacia
- Bursitis
- Arthritis
- Tendonitis

FEATURES AND BENEFITS

- Dual action hinges are moulded into the brace to maintain a low profile
- Accordion molding in the popliteal area reduces bunching behind the knee
- Lycra liner offers a breathable contact area for comfortable and extensive use
- Varied areas of thickness give additional protection

REQUIRED MEASUREMENTS

- Knee circumference at mid-patella

ORDERING INFORMATION

Size	Knee circumference	Part#
Small	29 - 33cm	302153BLK
Medium	33 - 37cm	302155BLK

NEOPRENE KNEE SUPPORT WITH STABILISED PATELLA

INDICATIONS FOR USE

For patients suffering from knee conditions that may benefit from additional knee and patella support, such as: patellar tendonitis, subluxation dislocation, post-operation rehabilitation, post arthroscopic surgery, chondromalacia, bursitis, arthritis and tendonitis.

FEATURES AND BENEFITS

- Moulded material to maintain a low profile
- Accordion moulding in the popliteal area eliminates bunching

REQUIRED MEASUREMENTS

- Knee circumference at mid-patella

REBOUND® AIR WALKER

Rebound Air Walker is a circumferential walker with fully integrated air pump and release valve that provides easy, tool-free inflation and deflation for fine-tuned, consistent compression. It features a host of details designed to provide added protection, simplified application and usage.

INDICATIONS FOR USE

- Foot and ankle conditions that may benefit from motion restriction, such as:
- Grade 2 and 3 ankle sprains
 - Stable fractures
 - Tendon or ligamentous sprain
 - During postoperative or rehab phase. If used with the Achilles Wedge Kit, Achilles ruptures can be treated as well.
 - Rebound Air Walker Low Top
 - Foot and ankle conditions that may benefit from motion restriction, such as:
 - Stable foot fractures
 - Tendon or ligamentous sprain
 - During postoperative or rehab phase.

FEATURES AND BENEFITS

- Linked medial and lateral air bladders with a single inflation point provide balanced compression and are shaped to cradle the Achilles, holding the heel in place
- Rocker bottom promotes a natural, stable gait, while a trimmable, semi-soft toe bumper provides added protection
- Moisture-wicking softgood helps keep skin dry and comfortable
- Straps fasten in front for easy application, adjustment and removal
- EVA material provides greater shock absorption in the heel
- Fully-integrated air pump and release valve provides easy, tool-free inflation and deflation for fine-tuned, consistent compression
- Flex Edge™ overmolding conforms to each patient's unique anatomy to help limit the formation of pressure points
- Ventilated panels wick moisture to prevent microbial buildup and improve patient comfort

FORMFIT® AIR WALKER

The Formfit Walker Air provides immobilisation for patients suffering from soft tissue injury; grades 2 & 3 strains and sprains, and stable fractures. The patented pneumatic system is designed to increase stability while decreasing pain and swelling. The intuitive pump and clearly marked decompression valve make air/pressure adjustments easy.

INDICATIONS FOR USE

For foot and ankle conditions that may benefit from motion restriction, such as:

- Grade 2 and 3 ankle sprains
- Stable fractures
- Soft tissue injuries
- During postoperative or rehab phase

FEATURES AND BENEFITS

- Available in low top or standard height
- Integrated pneumatic system
- Low, wide rocker bottom promotes a stable, natural gate
- Shock absorbing sole for reduced impact at heel strike
- Breathable, seamless liner

REQUIRED MEASUREMENTS

ROM WALKER

INDICATIONS FOR USE

- Foot and ankle conditions that may benefit from motion restriction or controlled range of motion, such as:
- Grade 2 and 3 ankle sprains
- Stable fractures
- Achilles ruptures
- During postoperative or rehab phase

FEATURES AND BENEFITS

- Lightweight and low profile aluminum side struts
- Rocker bottom design assists gait
- Decreased heel-strike force on calcaneus
- Simple to apply and adjust by circumferential straps
- Dial lock hinges with adjustable ROM limitation
- ROM control from 0-45° of dorsi/plantar flexion (7.5° interval)
- Available in Standard and Air version

DH OFFLOADING WALKER®

Assists in the healing of plantar ulcers with a patented pressure relief insole

INDICATIONS FOR USE

- Treatment of plantar ulcers

FEATURES AND BENEFITS

- Shear force reduction by stabilising foot and ankle at 90°
- Wide low profile rocker bottom provides a smooth roll-through and increased stability for altered gaits
- Designed around Össur's unique Active Offloading Insole
- The softgood's patented inner bootie prevents the foot from migrating on the insole
- Provides a safe environment for the simultaneous use of wound care material
- Create an Instant TCC using a single roll of cast tape for patient compliance

REBOUND® DIABETIC WALKER

Offloading has proven to be a key factor in foot ulcer treatment and entails reducing pressure of the plantar area in general and the ulcer site in particular.

The Rebound Diabetic Walker is uniquely designed for effective treatment of plantar foot ulcers, with easy access and re-fitting during wound care, while improving the patient's mobility during the healing process.

The Rebound Diabetic Walker has major advantages over diabetic shoes and shoe inserts in its healing effectiveness and over total contact casting due to its ease of use, speed of application and low cost.

FUNCTIONAL HEALING - WHERE MOBILITY MEANS RECOVERY

INDICATIONS FOR USE

- Plantar foot ulcers and wound prevention

FEATURES AND BENEFITS

- Effective tri-laminate insole with removable shock-absorbing hexagons that promote ulcer offloading and a Plastazote, heat-moldable top layer that evenly distributes the pressure and minimises friction
- Unique pressure relief valve for preventing over-inflation, while balancing compression with customised fit
- Positioning Portals allow the clinician to check the fit of the walker at the heel bottom, in order to ensure appropriate positioning of the foot in the walker
- Anatomically designed shell that minimises shear forces by immobilising the foot and ankle at 90 degrees while providing protection
- Flex Edge® technology for relief of pressure points
- Rocker Bottom outsole for a smooth roll over while allowing for individual natural toe out
- Soft and breathable, low friction, machine washable liner for hygiene promotion and prevention of infection
- Tamper evident strapping for compliance monitoring

FORMFIT® PRO ANKLE

Össur Formfit® Pro Ankle is a compressive ankle sleeve with 2 integrated malleoli pads, designed to be worn after mild ankle injuries. The dynamic 3-D MotionTech™ knit is supportive and meets certified medical grade compression requirements. Proven superior to leading brands for moisture wicking and breathability, your ankle stays cool during wear. CoolVent™ technology in the area in front of the ankle further enhances breathability and comfort.

MotionTech™

CoolVent™

SmartPad™

FoldLock™

INDICATIONS FOR USE

- For ankle conditions that may benefit from compression, such as:
- Ankle injury rehabilitation
- Mild sprains and strains
- Mild instability

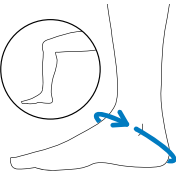

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- MotionTech™ for compression and dynamic fit with superior moisture wicking and breathability, keeping your ankle cool during wear
- Certified medical grade compression (20-30 mmHg)
- CoolVent™ technology in the area in front of the ankle for added breathability and comfort
- 2 integrated malleoli SmartPads™ for targeted support and cushioning
- Patented FoldLock™ system for easier and more secure application

REQUIRED MEASUREMENTS

Measure ankle circumference diagonally over the base of the heel and across the ankle bone. Ankle in 90 degrees.

FORMFIT® ANKLE BRACE (SPEEDBRACE)

The Formfit Ankle brace provides stability and protection for the ankle – whether used prophylactically, for chronic instability or following an injury. A hybrid between a rigid ankle stirrup and a soft ankle support, the Formfit Ankle ensures a close fit which limits inversion, eversion, flexion and extension movements. The low profile design fits easily into shoes and the quick lace up feature makes it easy to don and doff. Breathable material ensures it can be comfortably worn all day. The Formfit Ankle with Figure 8 strap version, offers an even greater level of support, by further limiting the range of motion of the ankle.

INDICATIONS FOR USE

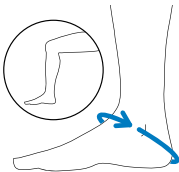

- Ankle injury rehabilitation/immobilisation (Grade I/II sprains)
- Support chronic instability
- Prophylactic use

FEATURES AND BENEFITS

- Breathable material
- Quick lace Up
- Inversion/Eversion Control
- Figure 8 strap version

REQUIRED MEASUREMENTS

- Measure ankle circumference diagonally over the base of the heel and across the ankle bone.

EXOFORM® DORSAL NIGHT SPLINT

INDICATIONS FOR USE

- Plantar fasciitis
- Post-static pain
- General heel pain
- Drop foot
- Achilles tendonitis
- Lower extremity overuse injuries

FEATURES AND BENEFITS

- Adjustable aluminum stay inside dorsal shell allows modification in the angle of dorsiflexion
- Soft, overmolded edges enhance comfort
- Hinged shell at the calf area prevents brace rotation
- Semi-rigid plantar pad reduces discomfort along the sides of the foot while providing an improved angle of dorsiflexion
- Non-slip surface on plantar pad prevents slipping during normal walking
- Circumferential heel and posterior strapping prevents migration while increasing overall comfort and effectiveness
- Strapping and shell perforations improve comfort and breathability

REQUIRED MEASUREMENTS

- Shoe size

FORMFIT® NIGHT SPLINT

The Formfit Night Splint, designed to help relieve the pain associated with plantar fasciitis by providing a gentle overnight stretch. Straps can be adjusted from 0° up to 10° degrees as needed. The soft breathable liner and padded straps provide comfort and help keep patient cool. Straps adjust from 0°-10° dorsiflexion

INDICATIONS FOR USE

Conditions that may benefit from resting with the ankle in a neutral position, such as:

- Plantar fasciitis
- Achilles tendinopathy

FEATURES AND BENEFITS

- Straps adjust from 0°-10° of dorsiflexion
- Contoured for a comfortable fit

AFO DYNAMIC

The AFO Dynamic provides a strong, lightweight solution for patients with varying degrees of drop foot secondary to a variety of neurological conditions. Össur has taken the carbon fibre technology from its Flex-Foot® product and incorporated it into the new AFO Dynamic to provide increased support over traditional ankle foot orthoses. The energy storing properties of carbon fibre make it an ideal material for this dynamic ankle foot orthosis because it provides real energy return. Best for those people leading busy lives, the AFO Dynamic will ensure a more efficient walk for the user.

INDICATIONS FOR USE

Drop foot secondary to:

- Cerebro Vascular Accident (CVA)
- Other neurological conditions
- Multiple Sclerosis
- Mild knee instability
- Charcot Marie Tooth disease (HMSN)

Contraindications:

- Severe ankle - foot deformities
- Fluctuating oedema
- Severe spasticity
- Neuropathy

FEATURES AND BENEFITS

- Carbon fibre design provides excellent strength-to-weight ratio and dynamic motion
- The tapered carbon heel stores energy and manages forces at heel strike
- Full-length toe lever provides full support while foot is loaded, as well as reduced shock to the contralateral limb
- Creates medio-lateral stability at mid-stance
- Reduces energy consumption by reducing hip hike
- Medial strut makes it less visible in shoe
- Open anterior tibia shell provides superior anatomical fit, and reduces heat and perspiration
- Weight limit: 120 kg

REQUIRED MEASUREMENTS

- Shoe size
- Calf height at widest part of the calf

AFO LIGHT

AFO Light provides support only where it is needed, eliminating unnecessary bulk and providing a cosmetically-appealing look. Using the best of Flex-Foot® technology and the energy storing properties of carbon fibre, AFO Light offers a strong and lightweight solution for people with mild to moderate drop foot.

INDICATIONS FOR USE

Drop foot secondary to:

- Charcot Marie Tooth disease (HMSN)
 - Cerebro Vascular Accident (CVA)
 - Other neurological conditions
 - Multiple Sclerosis
 - Mild knee instability
- Lower extremity overuse injuries
 - Severe ankle - foot deformities
 - Fluctuating edema
 - Severe spasticity
 - Neuropathy

FEATURES AND BENEFITS

- Energy return and propulsion assistance of the limb at toe off
- Supports the foot for ground clearance during swing phase
- Carbon fibre design provides excellent strength-to-weight ratio and dynamic motion
- Gradual plantar flexion at initial contact
- Stiffness gradient at heel and the toe correspond to ground reaction forces as they are applied to the foot
- Easy to don and doff
- Weight limit: 100kg

AFO LEAF SPRING

AFO Leaf Spring is a pre-fabricated polypropylene ankle-foot orthosis designed to support flaccid drop foot. It provides a semirigid section for toe clearance and support, yet has a thin, flexible foot plate for easy trimming. The absence of a heel section makes the Leaf Spring more comfortable to wear and provides a better fit in shoes.

INDICATIONS FOR USE

- Drop foot
- Mild drop foot secondary to other neurological pathologies

FEATURES AND BENEFITS

- Lightweight injection-molded polypropylene
- Thin, flexible foot part which is easy to trim with scissors
- Absence of heel section for improved comfort

REQUIRED MEASUREMENTS

- Shoe size

ORDERING INFORMATION

Size	Shoe Size US	Shoe Size UK	Height	Left	Right	Foot Plate Length

Large	11-14	7-10.5	12" (30cm)	O-110230	O-110130	28cm

REBOUND FOOT-UP®

Rebound Foot-Up is a lightweight ankle/foot orthosis (AFO) that offers dynamic support for drop-foot or related disorders that require dorsiflexion support. The Rebound Foot-Up supports the ankle dorsiflexion during swing phase. Dynamic support is provided by an elastic strap connected to the shoe by either a transparent plastic inlay placed between shoelaces, or by a nut and bolt fastened through the eyelets. The positioning of the fastening allows for individualising the support by providing the option of positioning the dorsiflexion support on the medial or lateral side. When using the plastic inlay, the dorsiflexion support becomes neutral.

The Rebound Foot-Up Ankle Cuff has a smart clamp that holds the cuff in place and facilitates one-handed donning and doffing.

Optional: Rebound Foot-Up Foot Wrap can be used when barefoot or in open shoes or sandals. The adjustable elastic strap is attached to the Foot Wrap using a nut and bolt fastened through the eyelets.

INDICATIONS FOR USE

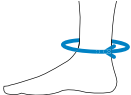

- Drop-foot
- Disorders that require dorsiflexion support

FEATURES AND BENEFITS

- Dynamic and discreet support for drop-foot or related disorders that require dorsiflexion support
- Improved function, ease of use, comfort, and quality
- Allows for voluntary plantar flexion
- The elastic strap is adjustable and easily replaceable
- The Rebound Foot-Up Ankle Cuff and Rebound Foot-Up Foot Wrap are made from breathable material that can be worn comfortably for long periods of time
- The Rebound Foot-Up is hand-washable
- Positioned medial or lateral support
- Contoured to the shape of leg
- Adjustable strap length
- Smart clamp facilitates one-handed donning / doffing
- Optional Rebound Foot-Up Foot Wrap can be used without shoes or in open shoes or sandals

REQUIRED MEASUREMENTS

- Circumference of ankle, measured around the malleoli

DH OFFLOADING POST-OP STYLE SHOE

Designed for use in the treatment of plantar wounds, this shoe can be an excellent alternative to post-op style shoes with static pads (wool, felt, foam, etc.). It accommodates the ambulatory and compliant patient for short-term treatment (1 to 4 months).

INDICATIONS FOR USE

- Plantar wounds
- Post-operative use
- Plantar foot ulcers

FEATURES AND BENEFITS

- Designed to accommodate either left or right foot
- Designed around Össur's unique Active Offloading Insole
- Designed to accommodate bulky dressings
- Super soft nylon upper with reinforced heel counter provides extra comfort and stability
- Patented removable toe pieces aides in wound accessibility for daily wound site inspection
