## Direct Socket TF

Workday eLearning Course

Direct Socket TF is a socket solution for transfemoral amputees of all activity levels. With the use of the Direct Socket materials and tools, and the flexible Össur Brim, the fabrication process is standardised and can be made in one session.

Patients will benefit from improvements in outcome measures, comfort, range of motion and satisfaction.

**Revised Prices For 2022**

On 8 November, we advised our 2022 price increase would be 2.5% to cover CPI related cost increases. Since then, we have continued to see significant cost increases from our suppliers. These are being driven by worldwide shortages in raw materials leading to increased manufacturing costs (8-10% increase), as well as increased costs to inbound & domestic freight (20%+ increase). We have attempted to absorb as much of this additional cost as possible in the challenging COVID environment but need to amend our price increase to 5%. New pricing will be effective from 1 January 2022.

Should you have any questions related to these price changes, or would like a copy of our price list, please do not hesitate to contact your local Össur representative. Thank you again for choosing to partner with Össur. We are committed to serving you with excellence, and your confidence in us is greatly appreciated.

---
