Miami JTO[®]

Miami JTO[®] Thoracic Extension is designed in conjunction with leading spine surgeons, orthotists and nurses.

The orthosis is used exclusively with all Miami J[®] collars when even greater stability at the cervical junctions is indicated.

Miami JTO[®] Thoracic Extension is a versatile, tool-free device with a patented chin strut, providing more control than a collar alone can provide, designed to treat cervical and high-

Key Features:

- Patented design with 'floating back' permits maximum immobilisation without the risk of compensatory motion.
- Snap on and off without tools.
- Sorbatex™ II padding is antibacterial and inhibits microbial growth, which enhances comfort and helps assure patient compliance.
- MRI, CT and X-ray lucent, MR compatible.

Nathan Jo's CTi Custom Story

Nathan started training in taekwondo when he was 11. His school was heavily focused on a very martial form of taekwondo which required a lot of leg kicks as a teenager causing damage to both of his knees. He stopped taekwondo for a while, but when he began University, he picked the sport up again. Nathan admits he was a little overconfident and in turn, botched the landing of a 360 degrees tornado kick sustaining a partial ACL tear and lateral meniscus tear.

Due to his injuries, Nathan has to prevent hyperextension and twisting of his left knee and has tried a few different braces to help with this. Pushing forward and not giving up on his training, Nathan met a taekwondo master who was a below-knee amputee who wore an Össur Prosthetic Leg and referred him to Össur to get a brace. He loved to tell Nathan that if he could train with one leg, Nathan could train with dodgy knees.

He was introduced to the Össur [CTi Custom](#) in 2019 and reported that it gives great support and ensures that there's no twisting of his knee. In making the [CTi Custom](#) for Nathan, a 3D scan was taken of his leg and was used to mould the brace. He said it was the most comfortable brace that he has tried out of many others. Last year, Nathan got a CTi for his right knee as well to help balance the weight and give some extra support.

Currently, Nathan focuses on Historic East Asian Martial Arts, especially a lesser-known style called Jedok Geom recorded in the 1700s manuscript Muyedobotongji from the Joseon Dynasty. Before Nathan had the [CTi Custom](#) he had a lot of instability and had many nights after training with an icepack over his knee due to pain. Now that he has the [CTi Custom](#), he told us there's virtually no instability during training even after 2-3 hours of hard training and sword sparring.

ABN Merge Notification

Thank you for your continued support and ongoing valuable engagement with our team. We continue to strive to deliver leading industry customer service, clinical & technical training as well as logistics support.

Effective 1 July 2022, **Össur Australia – OA & Injury Solutions Pty Ltd** will be amalgamated into **Össur Australia Pty Ltd**. This will necessitate a change in the company name, ABN & associated bank details which are detailed below.

Please ensure all documents from 1 July 2022 are detailed with the following Company Details:

EXISTING DETAILS	DETAILS EFFECTIVE 1 JULY 2022
Current Company Name: Össur Australia – OA & Injury Solutions Pty Ltd	Company Name: Össur Australia Pty Ltd

Meet Össur's CTi Ambassador - Daniel Milner

Daniel is a 9-time Australian Off-Road/Enduro Champion, the 2018 world IDSE individual winner, 2-time gold medalist at ISDE and a 3-time Hattah

Desert Race Champion. Daniel has been wearing the CTi Knee Braces for the last 5 years.

"I believe they are by far the most comfortable and most supportive braces you can wear. I don't just use my braces for my job, racing motorcycles, but also for my hobbies which include snowboarding and wakeboarding. It's awesome how much use you can get out of my CTi Knee Braces because they are so versatile. They have helped me achieve my goals over the years by giving me the confidence to go out and ride at 100% knowing I have the best protection possible. I have had many good crashes over the last few years as well as hard knee dabs and they are still running strong! –

Daniel Milner
