Kate Leeming's Unloader One[®] X

On 26 February 2022, Kate Leeming began her expedition through the Andes. Her journey involves cycling volcanoes over 6000m high. What cannot be accomplished on the bike, including reaching summits will be walked on foot. These are non-technical climbs and going up won't be an issue, however, descending can be difficult. Any major mountain descents Kate has done in the last decade have been a real issue and caused major swelling. However, reaching the

summits is an important part of the story.

Össur caught up with Kate a month into her journey to see how her **Unloader One® X** knee brace has been helping her.

"Another success story for me was that my badly damaged right knee survived. I have no problem ascending, but descending is always my biggest fear. Descending Mount Cameroon (4100m) in 2010, my knee was so swollen, I couldn't turn a full pedal revolution on the bike. I said never again, I can't risk it. Then in 2018, I was in a similar situation trekking to Ralakung village in the Indian Himalayas. I said, never again! This time I wore an Össur "Unloading knee brace" to keep my femur and tibia from grinding – and it really worked! Very pleased."

Next up, Kate will be cycling the highest cyclable track in the world in southwest Bolivia, with the plan to also summit. If so, she plans to wear her **Unloader One X** knee brace, which really helped for the Acotango descent.

Össur CTi® Ambassador - Sam Logan

Sam Logan wears Össur's CTi® Custom Knee Brace which has restored his confidence while surfing. He sustained multiple injuries to his right knee, leaving him with very little confidence while surfing.

"Luckily I have been able to team up with Össur and now wear one of their CTi® Custom Knee Braces. This has restored my confidence above and beyond." - Sam Logan.
