Improved Connect TF

New look, Reduced Weight, Wider Range of Use

Connect TF is a user-friendly, comfortable transfemoral socket for low-active amputees which can be donned safely in sitting.

Connect TF has been relaunched to improve ease of use for patients. The new carbon composite frame results in a lighter socket, enabling people with shorter residual limbs to benefit from Connect TF. The pull-to-release clutch mechanism prevents accidental release and is easier to grip for people with poor dexterity.

The Connect TF improvements will be covered in an upcoming webinar, which will include the features and benefits, user profile and fitting and adjustment options. To find out more, request training by clicking the button shown below:

Mobility Clinic on the Snow 2022

The team at Össur Australia were pleased to host the first Mobility Clinic on the Snow event in over 3 years. The 4-day event took place at Thredbo Resort, NSW in collaboration with Disabled Winter Sports Australia.

The Mobility Clinic on the Snow welcomed 8 Athletes of all ages and abilities between 6 and 59 years old. Out of the 8 Athletes, there were 5 skiers and 3 snowboarders who had the opportunity to learn specific exercises and techniques from Össur Head Coach, Joany Badenhorst. The Athletes were partnered with a guide from Disabled Winter Sports Australia to ensure that their mobility goals on the snow were achieved. We are so grateful to have been able to run the event again, and we cannot wait for the next one in 2023!

Luis's Rheo Knee Story

Originally from Colombia, Luis has been living in Australia for 15 years and has been an above-the-knee amputee for nearly four years. Luis relies on his prosthesis to keep him active and to maintain his physical and mental health, especially in his role as a primary school teacher.

Luis has been wearing the [Paso Knee](#) which he enjoys using at the gym. He loves that the product is lightweight, quick-moving, easy to use, and safe for interval training at the gym and on his exercise bike.

Luis joined Össur at the Mobility Clinic in 2022, where he tried the [Rheo Knee XC](#) for the first time with the help of renowned amputee physio Cathy Howells. Luis describes his experience trying the [Rheo Knee XC](#) as easy, smooth, and natural to walk on. Click below to read more and watch Luis talk through his experience descending stairs for the first time since amputation
