Miami TLSO™ 464 Universal

The **Miami TLSO™** directly addresses the needs of patients and practitioners, simplifying preparation without compromising on fit or performance. The easy-to-use, pre-assembled Miami TLSO™ brace offers three configurations in one. Easily applied in over-the-shoulder or underarm configuration, donning and doffing are further simplified with the conveniently located quick-release buckles.

Key Features:

- Significantly superior comfort and ease of donning/doffing. Fully assembled for fitting with ease.

- Accommodates heights 155–193 cm
- Posterior thoracic extension option with ergonomic axillary strapping. Step down to an LSO as the patient progresses through rehabilitation.
- One-touch telescoping anterior-thoracic extension option with a single or double hinge.
- The convenience of a one-size Universal or individualise with a uniquely-sized anatomical design.
- Improve comfort and immobilisation with multiple strapping configurations and removable anchors.

AOPA Congress 2022 - Össur Recap

Össur had the honour to present at the recent AOPA Congress 2022 held in Melbourne over the weekend. The event was a huge success and included a two-part presentation, covering bracing options for amputees and conservative management of ACL injuries from our bracing team as well as POWER KNEE and

Neelesh Ravikumar presented his expertise on orthotic management of the contralateral limb for amputees, providing options to assist with ligament injuries and osteoarthritis. Tim Amor presented on how Orthotists use products such as the [Rebound® Post Op](#)

Knee and Rebound® ACL and their involvement in ACL management and how they can assist their patients to achieve their best outcomes.

A special thank you to the AOPA committee for arranging yet another fantastic conference, and for giving us the opportunity to present and educate prosthetists and orthotists on an array of interesting subject matters.

ÖSSUR WEBINAR SERIES

Minimally Invasive Foot Surgery

Webinar Presenter: Mark Blackney

In this webinar, Mr Mark Blackney will discuss minimally invasive foot surgery for bunion and lesser toe deformities.

Topic covers included:

- 1) Development of technology
- 2) Conditions treated
- 3) Advantages
- 4) Pitfalls

Date: Thursday 17 November, 2022

Time: 7:00pm - 8:00pm AEDT

Jessica Dunn Unloader One® Case Study

"As an avid fan of the Unloader One brace, I never shy from the opportunity to use it for appropriate clients. One client, in particular, was referred for a brace for a left medial meniscus tear. He was a builder with his own company and therefore had a very physical job that he needed to return to ASAP. A knee sleeve was not going to cut it. He presented with discomfort in his left medial knee and, due to increased reliance, he began to experience some tenderness in his right knee. The patient had funding approved for an Unloader One Knee brace and within one month of wearing it, was able to return to work.

He was back in the clinic 6 weeks later requesting the same brace for his right knee after scans showed signs of wear and tear in the medial compartment. The success with the left knee brace meant there was no hesitation in him purchasing a right knee brace for himself privately. Upon recent adjustments to the braces, the patient informed me he wears them daily for work. The effect of the braces makes waking up the next morning and heading back to the site all the more achievable." - Jessica Dunn
