Rob Hodgson - Wishes Becoming Reality

Following complications due to a COVID-19 infection in early 2020, Össur Clinical Specialist, Rob Hodgson, had been waiting over 12 months for a new heart. As of 17 October 2022, Rob and his family's wishes came true as a heart donor was found. We are pleased to report that the transplant was a success, and Rob is currently recovering from the procedure. Thank you to everyone that has supported Rob and his family during this time, and we hope to provide further updates of his recovery soon.

Introducing the latest additions to the Pro-Flex® Family

Both the Pro-Flex® ST and Pro-Flex® Modular are designed for low to high activity users looking for flexibility and confidence to face everyday life activities. Pro-Flex® Modular is a lightweight shank height adjustable prosthetic foot which reduces the need for additional components between the socket and foot. An alignment drill guide is available for easy setup for the Pro-Flex Modular.

Both feet make it easy to walk on a variety of terrain thanks to the multifunctional design and combination of dynamics and ground compliance. These feet are fully waterproof which means they are fully resistant to both chlorine and saltwater submersion. Unity is not available for Pro-Flex® ST and Pro-Flex® Modular at present. Click on the buttons below to find out more about the Pro-Flex® ST and Pro-Flex® Modular

AOPA Congress 2022 - Össur Recap

The Össur Prosthetics team was proud to present at the recent AOPA Congress 2022 in Melbourne last weekend. The team presented on two presentations relating to the [POWER KNEE](#) and Össur prosthetic solutions through the clinical journey.

The POWER KNEE workshop presented by Clinical specialist Lizzie Carey and OAM Physiotherapist Cathy Howells covered the medical benefits, and functions as well as a live demonstration of training tips about progression onto the POWER KNEE. The workshop included a live demonstration of the POWER KNEE performing correct techniques used on level ground walking, resisted gait training, and how to stand up and sit down.

The second presentation discussed Össur prosthetic solutions through the clinical journey by Clinical specialists Laura Roberts, Sarah Mulroy-Lang and OAM Cathy Howells. The workshop highlighted the different stages of care including Post-Op Care, rehabilitation, and Lifelong Care. A range of Össur products was featured such as [Post-op liners](#), [Össur rigid dressing](#), [Connect®TF](#) and Össur leg solutions. Tips and tricks for gait training for transtibial and transfemoral amputees on different Össur products were also featured.

A special thank you to the AOPA committee for arranging yet another fantastic

conference, and for giving us the opportunity to present and educate prosthetists and orthotists on an array of interesting subject matters.

Össur Mobility Clinic on the Waves is Back

Register Now

We are excited to bring to you Össur Mobility Clinic on the Waves 2022! Join us at Nobbys Beach, Newcastle and learn the basics of adaptive surfing with Australian Surfing Champion, Jade 'Red' Wheatley, and the surf team at Newcastle Surf School. The Össur Mobility Clinic on the Waves provides a unique opportunity for amputees and people with limb differences around Australia to learn how to surf in a safe and fun environment. Family and friends of participants are welcome to join.

Protect and Sensitive

Liners Discontinuation

Iceross PROTECT and Iceross Sensitive Liners have been scheduled for discontinuation in December 2022. The recommended appropriate substitute for the Protect Liners is the Iceross Dermo range, and for the Iceross Sensitive Liners, the Iceross Comfort range.
