## Pro-Flex® ST & Pro-Flex® Modular

Brand New & Fully Waterproof

Meet Pro-Flex Modular and Pro-Flex ST, the newest members of the Pro-Flex Family. Modular and ST are lightweight and designed for low to high-active users looking for flexibility and confidence to face everyday life activities. These versatile [waterproof prosthetic feet](#) combine dynamics and ground compliance to provide a smooth rollover and controlled push-off, making it easy to go through full strides on different terrains. To access the technical specifications of the products, [click here](#). To learn about the entire Pro-Flex Family, download the [full family brochure here](#).

## Pro-Flex XC with Unity Waterproof Upgrade

The Unity for Pro-Flex XC has been upgraded and is now rated waterproof, according to the new waterproof definition that includes both saltwater and chlorinated water. Improvements include a new coating on the Unity housing as well as a minor design change on the housing, where edges were changed from chamfer to fillet. To learn more about our waterproof range, click the link below.

# Reminder Price Changes 2023

From 1 January 2023, Össur ANZ will implement a price increase across our range of products. Should you have any questions related to this price change; or would like a copy of our price list, please do not hesitate to contact your local Össur representative or Customer Care on 1300 123 268.

## Why Power Knee?

The [Power Knee](#) is proven to create more natural, symmetrical motion and significantly reduces the energy cost of walking. The product has no annual service requirements, and you may add up to 6-years of warranty cover. We offer flexible and supportive educational pathways and trials to develop skills using the Power Knee. Here are some more reasons why you should choose the Power Knee:

### **Endurance:**

- Requires less energy input for walking.
- Automatically adapts to speed and direction changes.

### **Symmetry:**

- Achieves a closer approximation of normal walking.
- Powered lift offers even support for standing and ascending.

- Mimics natural muscle activity.

**Stability:**

- Controls resistance throughout descent.
- Active swing extension prepares for the next step even when walking through challenging terrain like sand or tall grass.
- When your weight is quickly shifted to your Power Knee it locks and provides time for you to respond.
