

## TOTAL KNEE® 2000

UNITY  
COMPATIBLE

Total Knee 2000 offers shock absorption, comfort and a natural gait. Mid-swing shortening offers increased toe clearance during swing and the 3-phase hydraulic swing control accommodates changes in walking speed. Plus, the adjustable stance flexion feature mimics the knee flexion that occurs during early stance.

- Polycentric knee with geometric locking system.
- Swing control adjustments through 3-phase (3-valve) hydraulic system.
- Adjustable stance flexion.
- Adjustable extension promoter.
- Low build height, useful for long transfemoral limbs or knee disarticulation.
