Improvements to the Össur Brim

A key component of the Direct Socket TF is the Össur Brim. Össur Brims have recently received the following improvements:

- New textile for improved durability
- Lateral wall height increased
- Updated packaging
- Please note: new item numbers.
- New sizes and change in size intervals:
 - New textile for improved durability
 - Progressive size increases, starting with 2cm intervals for smallest sizes, increasing to 2.5cm intervals for medium sizes and 3cm intervals for largest sizes.

Reminder – Össur Brims are indicated for use in TF Direct Sockets with the braids and resin provided in the Direct Socket kits.

Direct Socket Training Courses

Össur Academy is excited to be running in-house courses for both Direct Socket TT and Direct Socket TF in 2023, at our new facility in Melbourne.

Each course runs for two days, and participants will receive the hands-on training required to gain confidence and experience with the Direct Socket system in an environment that is removed from the everyday distractions of a busy clinic.
