WELCOME FROM ÖSSUR!

As the background might suggest, our roots are not in the Netherlands, but in Iceland, a special and mystical country. Founded in 1971, we are active in the field of prosthetics and orthosis. We would like to take this opportunity to tell you a little bit more about who we are, what we do and what we would like to achieve.

The growth of a company can never be predicted, but great energy and enthusiasm can take you far. The foundation of our company is that we strive daily to improve people's mobility and help them live a 'life without limitations', with more than 3,700 employees around the world happy to contribute to this cause.

I hope you enjoy reading this and see you soon.

On behalf of the Benelux team,

Dries Coenen
Director Sales Benelux

OUR MISSION, OUR PASSION

Passion for innovation and quality has been driving successful patient and customer outcomes for decades. Our mission is to improve people's mobility so they can live a 'life without limitations'.

We have the vision to be a leading organization in the field of non-invasive orthopaedic devices. We focus on improving people's mobility by successfully making innovative technology available, within the field of prosthetics and orthotics. We also have extensive knowledge of compression therapy. Össur generates value for its customers, shareholders and employees through a strategy focused on innovation, efficiency and growth.

Innovation

Execute Ideas that add Value

We embrace innovation in all our actions by creating value for our customers. We will be at the forefront of indication-related innovation to ensure our consistently strong position in the market.

Efficiency

Do Business Efficiently

We strive to increase efficiency and drive continuous improvement. We run efficient operations in the most optimal locations, hire passionate employees and deliver strong profit and cash flow.

Growth

Sustainable Growth

We will achieve growth by successfully commercializing our innovation through our local go-to-market strategy and commitment to our customers' needs. We will further develop our business and leverage untapped market opportunities.

Our core values

HONESTY
Stay true

FRUGALITY
Make every step count

COURAGE
Aim higher

THE CUSTOMER FIRST

We can only be successful if our customers are too. Therefore, we believe that it is important that every contact with our clients adds value and the interests of the user are always paramount. We want to be a partner for our customers in the care issues that arise every day, so that they can focus completely on their patient's recovery and ensuring a positive experience.

The collection and dispatch of orders takes place from our logistics center in Eindhoven. Our Customer Service department and After Sales department are also located here, and they are available every working day to take care of orders and to follow up on practical questions.

In addition, we have a team of specialists in sales and clinical support: our Area Managers. They are on the road every day for customer visits, to provide support with clinical issues and work with various departments.

At Össur, we only go for long-term customer relationships and do everything we can to exceed customer expectations. In doing so, we adhere to our values: honesty, frugality and courage. We strive to do better every day and are happy to discuss this with our customers.

ORDERING INFORMATION

- Please quote your account number when placing an order
- Please quote model numbers and any other specification required when ordering
- Please quote your purchase order number
- Orders placed by telephone and then emailed should be clearly marked with 'CONFIRMATION ORDER' to avoid risk of duplication

RESPONSE TO ORDERS

We are proud of our service to our customers and maintain large stocks of products to expedite delivery. Orders received before 14.00 will be processed and dispatched same day.

METHOD OF DISPATCH

Your order will be dispatched by the most economical means available, with regard to weight / volume and the degree of urgency. Unless otherwise instructed, orders will be sent by standard 2 - 3 day delivery. Timed deliveries are available on request. Please contact Customer Care for pricing.

CUSTOM PRODUCTS

Össur®, through our own manufacturing facility, have the expertise and resources to create one-off custom requirements for products such as the Unloader Custom, Rebound PCL Custom, Rebound ACL Custom, CTi Custom. Where this is the case, please allow 10 working days for delivery.

INCORRECT DELIVERY

On receipt of the goods the customer is required to check the consignment. In the unlikely event that the type or quantity of goods is incorrect then you are requested to notify our Customer Care Department within 7 working days of the date of delivery. After 7 working days Össur® cannot accept responsibility for an alleged incorrect delivery.

RETURN OF GOODS POLICY

You can return your unwanted products to us free of charge for up to 365 days after you purchased them. Authorisation must be issued by Össur® UK Ltd prior to goods being returned, please contact Customer Care for a return reference number and ensure sections 1-5 of Return Advice Note (on the back of the dispatch note) are fully completed. Soiled, custom manufactured, modified or obsolete goods may not be returned. Goods accepted for return must be in a resalable condition, guaranteed infection free and in the original packaging. Össur® reserves the right to charge delivery costs and / or re-stocking fee of up to 20% on returned goods.

30-DAY MONEY BACK GUARANTEE ON THE UNLOADER ONE AND UNLOADER ONE X

A product that is risk-free; if the product doesn't work for a patient, you get a full refund.

ÖSSUR NO QUIBBLES GUARANTEE.

At Össur we know that accidents can happen. To put your mind at ease and to avoid unexpected costs, we are pleased to announce that the Unloader One is covered by our Össur Care, No Quibbles Guarantee.

This coverage runs concurrent with the original 2 year warranty as applicable and covers accidental damage during the normal working process of the brace and in accordance with the safe usage guidelines provided in the product manuals.

TERMS AND CONDITIONS OF SALE

Our full Terms and Conditions of Sale can be provided upon request.

The product range and availability may change during the period that the current catalogue runs.

The returns policy does not apply to custom made or modified goods. Statutory rights are not affected. Please check with Customer Care at time of sale if in doubt.

Telephone Orders: 00800 3539 3668

E-Mail: orders.benelux@ossur.com

SINGLE PATIENT USE

It is a condition of Sale that any orthopaedic product purchased from Össur® is restricted to 'Single use Only' by the originally-fitted patient in order to protect the care provider and the patient against potentially adverse consequences of infectious disease transmission or material instability resulting from previous use by the original wearer. Any expressed or implied warranties are voided if the orthosis is re-used for another patient. Any orthosis purchased from Össur® must be prescribed and applied by a qualified clinician to ensure that it meets the needs of the particular patient and accomplishes the desired results.

ÖSSUR OA SOLUTIONS

Enhance quality of life and mobility for people living with osteoarthritis.

These product solutions have been built on decades of experience and are designed to enhance the quality of life of people living with osteoarthritis by reducing pain and improving mobility. Through innovation leadership, OA expertise and partnerships with medical professionals, we offer comprehensive, proven and effective treatment options.

UNLOADER®

The Össur Unloader® brand name has become synonymous with osteoarthritis bracing, representing OA Solutions' technology as the industry standard, with more than 15 clinical studies demonstrating its efficacy.

Össur strives to maintain its position as the innovation leader for OA Solutions by continuing to develop simple, yet effective clinically proven treatment solutions that increase people's quality of life.

ÖSSUR INJURY SOLUTIONS

For people recovering from fractures, ligament injuries or in need of post-operative treatment solutions.

These product solutions have been built on decades of experience and are designed to enhance the healing process of bone and soft tissue injuries. Through innovation leadership, proven biomechanical approaches, and partnerships with leading medical professionals, we strive to offer comprehensive and effective treatment options.

Össur Injury Solutions are globally recognised, primarily under the brand names CTi®, Rebound® and Miami®, all of which are developed to assist healing and increase people's quality of life.

Our expertise in Injury Solutions has driven us to take the next step forward by developing indication-specific products which are designed to optimise healing while maintaining function and mobility. These Functional Healing products incorporate Össur proprietary technology and are designed to enhance clinically relevant outcomes.

FUNCTIONAL HEALING –
WHERE MOBILITY MEANS RECOVERY.

UNLOADER ONE[®]X

Unloader One X improves mobility by providing pain relief from knee osteoarthritis, degenerative meniscal tears, and other unicompartmental knee conditions that may benefit from unloading.

It features Össur's unique, patented, and clinically proven 3-point Leverage System that generates unicompartmental unloading of the knee joint.

Available in custom and OTS versions to help you fit your patient's different leg anatomies.

INDICATIONS FOR USE

- Moderate to severe unicompartmental knee osteoarthritis
- Degenerative meniscal tears
- Other knee conditions such as:
 - Articular cartilage defect repair
 - Meniscal repair
 - Avascular necrosis
 - Condylar bone marrow lesions
 - Tibial plateau fractures

FEATURES AND BENEFITS

- Relieves Pain - 3 Point Leverage System with Dynamic Force System[®] straps, rigid shells, and a single upright hinge biomechanically unloads the affected knee compartment.
- Control - Tool-free SmartDosing[®] dials enable the patient to fine-tune the strap tension to control pain.
- Comfortable - Skin-friendly liners feel great against the skin and reduce pressure points. Anti-migration strap technology design captures the widest part of the calf to reduce brace migration.
- Easy-to-Use - Alignment guide on hinge facilitates correct positioning of the brace on the leg and color coded touch points aid in easy donning and doffing.
- Easy-to-Wear - Slender frame with soft edges easily contours to individual anatomies and remains discreet whether worn under or over clothing.
- Easy Care - Entire brace is machine washable (washbag included).
- Field serviceable.

UNLOADER ONE®

Unloader One® is designed to relieve osteoarthritis knee pain and wearing it may help improve mobility. It features Össur's unique, patented 3-point leverage system, which combines a single hinge with dual Dynamic Force System (DFS) straps to provide unloading of the knee joint. Clinical studies demonstrate that this system may relieve osteoarthritis knee pain and improve function and quality of life while being worn. Colour-coded Quick Fit buckles make donning and doffing simple, while flexible shells and breathable liners are designed to improve comfort and reduce migration, thus helping to ensure compliance.

INDICATIONS FOR USE

- Moderate to severe unicompartmental knee osteoarthritis
- Degenerative meniscal tears
- Other knee conditions that may benefit from unicompartmental unloading, such as Articular cartilage defect repair, Avascular necrosis, Tibial plateau fracture, Bone marrow lesions (bone bruises)

FEATURES AND BENEFITS

- Dual Dynamic Force Straps® designed to reduce pressure on sensitive bony surfaces of the knee, resulting in reduction of pain
- Lightweight frame, perforated for flexibility and ventilation, with flexible, low profile upright that contours to patient anatomy and allows use underneath clothing
- Tool-free SmartDosing® dial enables fine-tuned pain management and can be adjusted even when wearing the brace under clothing
- Colour-coded quick fit buckles enable easy application and removal
- Proprietary Sensil® silicone liners designed to reduce migration
- Available in standard and short version, for a perfect fit on shorter legs, too

REQUIRED MEASUREMENTS

- Circumference measurement: 15cm below mid-patella

Suspension Strap Kit	UNL00212

UNLOADER® CUSTOM

With a semi-rigid frame and an adjustable hinge, Unloader Custom accommodates a wide variety of leg shapes and sizes. That adjustable dynamic hinge, with a diagonal Dynamic Force Strap, allows for some of the largest unloading forces with the greatest amount of patient comfort. The clinically proven Unloader Custom braces have numerous options and can be further customized with a variety of colors, designs and accessories.

INDICATIONS FOR USE

- Mild to severe unicompartmental knee osteoarthritis
- Other knee conditions that may benefit from unicompartmental unloading

FEATURES AND BENEFITS

- Custom moulded semi-flexible shells are durable, adaptable to leg shape changes, yet rigid enough to contain tissue while force is applied at the knee.
- Patented Adjustable Dynamic Joint™ (ADJ) high-carbon steel hinge is strong enough to unload the pressure from the compartment of the knee.
- Dynamic Force Strap® designed to reduce pressure on sensitive bony surfaces of the knee, resulting in reduction of pain.
- Optional tool-free SmartDosing® dial option enables fine-tuned pain management and can be adjusted even when wearing the brace under clothing.

REQUIRED MEASUREMENTS

- Custom made to measure (3D-Scan or patient cast)

REBOUND® DUAL BASIC AND REBOUND® DUAL BASIC ST

The Rebound DUAL Basic and Rebound DUAL Basic ST offer the value and simplicity you need to navigate the complex coverage landscape. Within the versatility of the Rebound DUAL collection, Össur offers high quality solutions from a single source, to help users transition to a successful recovery without compromise.

Rebound DUAL Basic

Rebound DUAL Basic ST
(Step-Through)

INDICATIONS FOR USE

The Rebound DUAL Basic is indicated for combined and non-combined instabilities of the:

- Anterior cruciate ligament (ACL)
- Medial collateral ligament (MCL)
- Lateral collateral ligament (LCL)
- Posterior cruciate ligament (PCL)
- (Only Rebound DUAL Basic) Acculign version only: Conditions requiring unicompartmental load control

FEATURES AND BENEFITS

- (Only Rebound DUAL Basic ST) Step-Through Design: advantage in comfort & fitting with ease
- (Only Rebound DUAL Basic) Multi-purpose length-adjustable upper frame accommodates the user's height, helping to ensure the perfect fit and enabling adjustment for varus/valgus alignment
- Össur Hinge alignment guide provides easy & accurate re-fitting for users, ensuring correct placement of the brace relative to the knee
- Lightweight aircraft aluminium frame keeps a low profile
- Doeskin liners for comfort & no-slip Activegrip™ strap pad
- Trimmable straps with tactile strap tabs
- Low-profile polycentric hinge with stop options for stability & range-of-motion restriction
- Step-through or Anterior frame design
- Suitable for low-high impact and sliding sports
- Optional PCL kit accessory for multi-ligament support
- Available in pre-fabricated sizes XS-3XL

REQUIRED MEASUREMENTS

- Knee caliper
- Thigh circumference 15 cm above mid patella

REBOUND® DUAL RECOVER

Rebound DUAL Recover is a dual purpose rehab to recovery brace with patient focused features. Rebound DUAL Recover provides intuitive use and tool-free hinge functionality in a lightweight design to meet your patient's needs.

INDICATIONS FOR USE

The Rebound DUAL Recover is indicated for combined and non-combined instabilities of the:

- Anterior cruciate ligament (ACL)
- Medial collateral ligament (MCL)
- Lateral collateral ligament (LCL)
- Posterior cruciate ligament (PCL)
- Acculign version only: Conditions requiring unicompartmental load control.

FEATURES AND BENEFITS

- The tool-free hinge provides easy adjustment and range-of-motion setting, while the brace stays on the patient
- No-slip ActiveGrip™ calf liner reduces migration and ensures a secure hold, even during sporting activities
- Doeskin thigh liner with comfort in mind
- Acculign slider upper frame can be adjusted to the patient's height and adapted by varus or valgus correction
- The lightweight aluminium frame avoids the 'step-through' design and is malleable so that it can be adapted to the patient's anatomy
- Positionable D-rings for individual adjustment and reduction of pressure points for special anatomical conditions
- The hinge alignment guide ensures correct placement of the brace relative to the knee
- Blue is You™ – intuitive blue touch points make patient education easy

REQUIRED MEASUREMENTS

M-L size: mediolaterally over the joint gap in a normal, weight bearing position.

Measure thigh circumference 15cm above mid-patella.

FORMFIT® OA EASE

The Formfit OA Ease is a single upright brace with a Dynamic Force System™ strap designed to relieve pain from mild-to-moderate unicompartmental knee osteoarthritis (OA). Its wraparound design is easy to apply and remove using simple rubber pull-tabs, colour-coded guide dots, and strap tension indicator lines. This low-profile knee brace is comfortable, easy to use, and adapts to a variety of leg anatomies. The Formfit OA Ease can also be machine washed for effortless care.

INDICATIONS FOR USE

Take control of mild-to-moderate OA pain with the Formfit OA Ease, an easy-to-wear knee brace with a simple wraparound design that can be applied and removed with ease.

- Mild-to-moderate unicompartmental knee osteoarthritis and/or degenerative meniscal tears
- Other conditions that may benefit from unicompartmental unloading

FEATURES AND BENEFITS

- Easy Wraparound Design - Simple rubber pull-tabs, colour-coded guide dots and a convenient hinge alignment guide make application and removal simple
- Relieves OA Pain - 3-Point Leverage System with Dynamic Force System™ strap and shells unload the affected knee compartment
- Comfortable - Lightweight and breathable fabric feels great against the skin and can be machine washed for effortless care
- Discreet – Low-profile brace with a slim hinge can be worn under clothes
- Control – Fine-tune strap tension for individual pain relief, with marked dosing indicator lines
- Extension kits and liners are available to further enhance fit and comfort

REQUIRED MEASUREMENTS

Measure calf circumference 15cm below mid-patella. Leg in extension.

Measure thigh circumference 15cm above mid-patella. Leg in extension.

FORMFIT® PRO KNEE OA

Össur Formfit® Pro Knee OA is a unique, compressive knee sleeve with a Dynamic Force Strap system, designed to provide pain relief from the early stages of osteoarthritis (OA). The dynamic, 3-D MotionTech™ knit is supportive and meets certified medical-grade compression requirements, and has been proven to be superior to the leading brands at moisture wicking and breathability, keeping your knee cool during wear. CoolVent™ technology in the popliteal area enhances breathability and comfort, while the distinct patella graphics help with intuitive placing of the sleeve. The integrated StayBilizer™ hinge, constructed from lightweight, flexible EVA material, is suitable for sports, such as football.

MotionTech™

CoolVent™

StayBilizer™

FoldLock™

INDICATIONS FOR USE

For osteoarthritis and other knee conditions which may benefit from unloading and/or compression, such as;

- Medial or lateral knee pain
- Early or mild unicompartmental osteoarthritis of the knee
- Symptomatic, unicompartmental meniscus degeneration

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- Patented DFS system.
- Certified medical grade compression (20-30 mmHg).
- Lightweight CoolVent™ knit in popliteal area for added breathability and comfort.
- Patented FoldLock™ system for easier and more secure application.
- Sports-compatible StayBilizer™ hinge made from light, flexible EVA material for optimum shape and fit. Patella graphics for intuitive placement.
- Available in 5 standard sizes and 3 comfort sizes.

REBOUND® CARTILAGE

Cartilage and meniscal injuries usually lead to significant limitations of knee function and knee pain. As surgery cannot be done on the day of diagnosis, prehabilitation is indicated to limit knee pain and keep the patient functional until surgery is scheduled. In addition, post-operatively, the success of meniscal tear and articular cartilage repair is dependent upon patient compliance during the rehabilitation process and the protocol is based on restricted weight bearing combined with gradual increase in activity. Many rehabilitation protocols suggest partial weight-bearing as the standard of care for successful outcomes. However, patient compliance to partial weight-bearing instructions with crutches has been shown to be inconsistent.

Rebound Cartilage is a protective functional solution designed for prehabilitation / pre-surgical management and rehabilitation of cartilage injuries and meniscal lesions. By protecting the healing tissue from overload, it fits into accelerated rehab protocols.

FUNCTIONAL HEALING - WHERE MOBILITY MEANS RECOVERY

INDICATIONS FOR USE

- Articular cartilage defect repair needing unicompartamental load reduction or range of movement restriction
- Cartilage knee trauma benefiting from unloading or movement restriction
- Meniscal repair
- Avascular necrosis
- Condylar bone marrow lesions (bone bruises)
- Tibial plateau fractures
- May also be beneficial for other unicompartamental knee conditions that require unloading

FEATURES AND BENEFITS

- Dual Cartilage Protection Straps™ (CPS) maintain joint unloading in flexion for protection of the cartilage during the healing process
- Breathable wrap around sleeve integrated with Sensil® silicone coated calf liners and doeskin thigh liners provide increased comfort while ensuring adequate suspension
- Colour coded Quick Fit buckles enable easy application and removal
- Optional modular Flexion Control kit when needed per prescribed rehab protocol for range of movement restriction.

REQUIRED MEASUREMENTS

- Circumference measurement: 15cm below mid-patella

FORMFIT® TRACKER

The Formfit® Tracker with micro-adjustable ReflexWing™ buttress realigns the knee cap, providing dynamic lateral support for common knee cap conditions. Its FlyWeight™ fabric delivers lightweight breathability and a low-profile design that feels great against the skin and minimises migration. PowerLock™ straps work in tandem with heat mouldable CustomFit™ hinges to provide a customisable fit for your patient.

INDICATIONS FOR USE

For knee conditions that may benefit from realignment of the knee cap and/or patients that would benefit from an added lateral support of the knee cap, such as:

- lateral knee cap subluxation or dislocation
- lateral maltracking

FEATURES AND BENEFITS

- CustomFit™ hinges for customised fit and support
- Anti-Migration Tech™ minimises migration
- PowerLock™ straps for secure lateral support
- ReflexWing™ buttress for comfortable knee cap realignment
- FlyWeight™ fabric for soft feel and breathability
- Durable and machine washable

FORMFIT® HINGED LATERAL J

Formfit Knee Hinged Lateral J is a sleeve design knee brace with a breathable Lycra-material and open popliteal area with two removable hinges and J-shaped buttress providing support to the patella. The knee brace is designed for patients that would benefit from realignment of the patella, and/or patients that would benefit from an added lateral support of the patella.

INDICATIONS FOR USE

Patients that would benefit from realignment of the patella, and/or patients that would benefit from an added lateral support of the patella.

- Lateral patellar subluxations and dislocations.
- Lateral patellofemoral malalignment.

FEATURES AND BENEFITS

- Breathable material
- Removable hinges
- Easy pull-on
- Lateral J buttress
- Open popliteal area

REQUIRED MEASUREMENTS

- Thigh Circumference: 6"/15cm above mid-patella
- Calf Circumference: 6"/15cm below mid-patella

CTi® OTS

The proven technology of the CTi knee brace is available with off-the-shelf convenience, providing adjustability and an excellent out-of-the-box fit while maintaining the level of support and protection that you expect from a CTi knee brace.

Outfitted with anatomically-correct Accutrac® hinges and flexible subshells and d-rings, the rock-solid CTi carbon frame provides a rigid exoskeleton that stabilises the knee joint. Breathable liners coated with bio-inert Össur Sensil® Silicone ensure CTi OTS remains properly positioned on the leg, for optimal functional benefit.

INDICATIONS FOR USE

- ACL, MCL, LCL, PCL, rotary and combined instabilities

FEATURES AND BENEFITS

- Anatomically-correct Accutrac hinges with extension stops to glide with the knee
- Flexible subshell and Adjustable Tibial Strap capture the tibia and allow adjustments in hinge depth for a more customised fit
- Breathable liners coated with bio-inert Össur Sensil Silicone to reduce migration and skin irritation
- Total Support System™ for ACL, MCL, LCL, PCL, rotary and combined instabilities
- Corrosion resistant materials, ideal for water sports
- Available in 2 models: Standard model for moderate to high impact levels, Pro Sport model for the impact levels

REQUIRED MEASUREMENTS

- Caliper measurement: Medio-laterally at joint width in a standard, weight-bearing position
- Circumference: Just below the distal border of the patella

CTi®3

CTi®3 brings a new vision to double upright knee braces. Innovative engineering makes CTi3 an excellent option for most of your patient population. Suitable for both everyday activities and sport, CTi3 offers great quality with its enhanced construction and anatomical fit for elevated comfort.

INDICATIONS

- For knee conditions that may benefit from increased AP and ML stability and protection, such as injuries to the ACL, MCL, LCL, PCL, rotary and combined instabilities.

FEATURES AND BENEFITS

- Enhanced construction – Lightweight, high strength carbon composite frames provide the optimal stiffness to weight ratio
- Anatomical fit – Designed to fit a wider range of leg shapes and includes an Accutrac® hinge to closely follow the knee's anatomical movement
- Elevated comfort – Unique liners enhance comfort with their special tread block pattern, which provides a balance of cushion and ventilation
- Easy-to-use accessories and replacement parts, including MX kits, replacement strap sets, liner sets and flexion stops

REQUIRED MEASUREMENTS

- Knee caliper
- Thigh circumference 20 cm above mid patella

CTi® CUSTOM

≤18

CTi braces provide the ultimate combination of stabilisation and protection of the knee joint. This truly custom made brace, with rock-solid CTi carbon frame, uses Accutrac® hinges with extension stops to glide with the knee and breathable liners coated with bio-inert Sensil® silicone to ensure the CTi remains properly positioned on the leg, for optimal functional benefit. CTi custom braces are available in different models and can be further customised with a variety of options, colours, designs and accessories.

INDICATIONS FOR USE

For knee conditions that may benefit from increased AP and ML stability around the knee, such as: ACL, MCL, LCL, PCL, rotary and combined instabilities

FEATURES AND BENEFITS

- Reversible field-serviceable d-rings and trimmable straps facilitate fast adjustments and customised fit (optional)
- Corrosion resistant materials, ideal for water sports
- Anatomically-correct Accutrac® hinges with extension stops
- Proprietary Sensil® silicone liners designed to reduce migration
- Available in 3 different models: Standard model for moderate to high impact levels, Pro Sport model for the impact levels and Vapor model for low to moderate impact levels

REQUIRED MEASUREMENTS

- Custom made to measure (CMS, Smartmeasure, 3D-Scan or patient cast)

22. Distal Border of Patella _____

JOINT SPACE

23.

Caliper measurement at joint space (1.6 - 2.0 cm less than #1) Take measurement in a weight bearing position at full extension

SHORTEN TIBIA COMPONENT/ SKI BOOT MEASUREMENT

_____ cm from the distal border of the patella to the top of the boot. Ski boot attachment is not available if the measurement is less than 18cm.

CMS INSTRUCTIONS

Patient should not be wearing shoes for the measurement procedure.

There should be no space between the block and the back of the knee. The system will not be accurate if the knee is measured in a flexed position.

1. Slide the lateral pad to the knee. Tighten to patient's individual comfort level. This measurement will be the actual width of the patient's knee brace.

2. Pre-set hinge depth at approximately 3.5cm, adjust if needed.

3. – 13. Patient should remain still with foot dorsiflexed throughout the lateral measurements and recording process.

9., 10. and 13. Measure using the horizontal bar of the tool measure the position of the highest point of the tibialis anterior.

- 9. As reference take the #1 hinge width / 2 - 1 = ...
(for example 13cm / 2 - 1 = 5.5cm)
- 10. should be 0.5cm less than 9.
- 13. should be 1cm less than 9.

14. – 17. The patient may now relax throughout measuring the medial contours from the contracted position. Please note that with larger legs this measurement may be a negative value. Please read the numbers carefully and record negative values if necessary, such as -0.5 or -1.5

18. – 22. Take the measurements with a soft measuring tape ensuring that the tape is snug but not to loose/tight.

Osteoarthritis Unloading

REBOUND® PCL

Unlike the anterior cruciate ligament (ACL), the PCL has the intrinsic ability to heal and regain functionality after injury. Physiologically correct positioning of the PCL during conservative or post-surgical rehabilitation is important, as the PCL experiences variable tensile forces during knee flexion, and healing of the PCL in an elongated position can lead to chronic instability and disability. Insufficient healing after a PCL rupture leads to significant pathologies, such as chronic anterior knee pain or knee osteoarthritis.

The Rebound PCL applies a physiologically correct dynamic force to the PCL during rehabilitation. The dynamic load on the tibia is generated by applying an anterior directed dynamic force on the calf area, and opposing counterforces on the anterior aspect of the leg.

FUNCTIONAL HEALING - WHERE MOBILITY MEANS RECOVERY

INDICATIONS FOR USE

- Non-surgical treatment of PCL ruptures

Post-surgical rehabilitation for:

- Partial PCL tears
- PCL reconstruction/augmentation
- PCL revision

LaPrade RF, Smith SD, Wilson KJ, Wijdicks CA. Quantification of functional brace forces for posterior cruciate ligament injuries on the knee joint: an in vivo investigation. Knee Surg Sports Traumatol Arthrosc [Internet]. 2014 Aug 22 [cited 2014 Dec 11]; Available from: <http://www.ncbi.nlm.nih.gov/pubmed/25145947>

FEATURES AND BENEFITS

- The Dynamic Tension System™ (DTS) is designed to facilitate healing by increasing the load on the tibia as the knee goes through flexion, and providing an anterior drawer force necessary to decrease load on the healing posterior cruciate ligament (PCL).
- Three shear knob options permit customisation of the biochemical correct posterior tibial load for each patient, and allow for adjustment, e.g. in case of swelling.
- A polycentric hinge with extension and flexion stops allows for range of motion adjustment. Lightweight brace with proprietary Sensil® silicone calf liner and doeskin thigh liner to reduce migration, while providing comfort to the user.
- Posterior frame for optimised support, with open anterior for ease of donning/doffing.

REQUIRED MEASUREMENTS

- Calf circumference 15cm below mid patella
- Thigh circumference 15cm above mid patella

REBOUND® ACL

The Rebound ACL brace is an evolution in bracing, designed to comfortably apply an anatomically correct, dynamic load to the anterior cruciate ligament (ACL). As an element in either conservative or surgical management, the Rebound ACL brace complements clinical protocols and is conducive to an ideal biomechanical joint environment as a foundation for long-term successful patient outcomes. The innovative technology in the Rebound® Dynamic Tension System (DTS) offers individualised adjustment options to reduce strain on the healing ACL.

FUNCTIONAL HEALING – WHERE MOBILITY MEANS RECOVERY

INDICATIONS FOR USE

Conditions benefiting from an agonistic force that varies throughout flexion in proportion to ACL tension applied to the thigh and calf in the sagittal plane. These may include:

- Anterior cruciate ligament (ACL) injury
- Reconstruction
- Non-surgical treatment

FEATURES AND BENEFITS

- Dynamic technology for knee stability, with a Dynamic Tension System™ that applies an agonistic, dynamic force to the ACL that is flexion-angle dependent (LaPrade et al., 2017) and designed to reduce ACL deficiency (positive anterior-drawer test), promoting knee stability.
- Specific load adaptation according to the patient's individual anatomy and rehabilitation requirements. Clinical and biomechanical studies indicate that the Rebound ACL brace reduces strain on the ACL during activity and significantly reduces strain on the meniscus in ACL-deficient knees (Tomescu et al., 2017). Biocompatible, hi-tech materials, including Blue is You™ patient touchpoints and ActiveGrip™ liners, promote suspension and comfort.
- Lightweight, aircraft-grade aluminium frame
- Available in sizes S-XL
- Flexion & extension range-of-motion lock-outs.
- Posterior frame optimised for fit and support, with open anterior for ease of donning/doffing Clinically-tested comfort, validated by wearers and with load mapping data collected during rehabilitation activities, the Rebound® Dynamic Tension System (DTS) provides a comfortable load to the posterior thigh and anterior tibia.

REBOUND® ACL

REQUIRED MEASUREMENTS

Measure knee caliper medio-laterally at joint width in standing, weight-bearing position.

Measure calf circumference 15cm below mid-patella. Leg in extension.

Measure thigh circumference 15cm above mid-patella. Leg in extension.

SMARTMEASURE®

A digital measuring system for custom knee braces on the iPhone or iPad. The most intuitive, efficient and accurate way to measure for any Össur custom knee brace. Utilises a section-based, step-by-step approach to guide you through the entire brace selection, measuring and order process.

Description	Part#
SmartMeasure Measuring Kit	CMS0000
Constant Force Caliper	B-312000000

Scans, CMS (CTI only), CCS and casting also accepted. Knee M/L required.

REQUIRED MEASUREMENTS

- Custom made to measure (Smartmeasure, 3D-Scan or patient cast)

EXTREME®

For bilateral bracing applications, saddle sports, and other situations where a single, lateral hinge is advantageous, consider Extreme. The custom made Extreme is durable enough for rigorous athletic challenges, yet its Triax® shells are malleable, offering adaptability to changes in leg size and varus or valgus alignment. A carbon steel Poli-axial® hinge and Dynamic Force Strap® combine to provide excellent rotational control and proprioception.

INDICATIONS FOR USE

- For knee conditions that may benefit from increased AP and ML stability around the knee, such as: ACL, MCL, LCL, PCL, rotary and combined instabilities

FEATURES AND BENEFITS

- The proven single-upright design provides dynamic stability, offering maximal support when the knee is under stress
- Dynamic Force Strap® minimises bulk and maximises agility.
- Optional tool-free SmartDosing® dial option enables fine-tuned pain management and can be adjusted even when wearing the brace under clothing.

REQUIRED MEASUREMENTS

- Custom made to measure (Smartmeasure, 3D-Scan or patient cast)

REBOUND® POST-OP KNEE

≤18

The simple, versatile post-operative knee bracing solution that is easy for everyone. Whether adjusting ROM, setting the drop lock, or altering the brace length, you'll appreciate the simplicity of the Rebound Post-Op knee brace.

INDICATIONS FOR USE

- ACL, PCL, MCL, LCL repairs/injuries
- Meniscal repairs
- Tibial plateau fractures
- Patellar tendon repairs
- Osteochondral repairs
- Condylar fractures
- Sprains/strains of the knee
- HTOs (High Tibial Osteotomy)

FEATURES AND BENEFITS

- Tool-free design and multi-purpose Smart-Fit™ packaging
- Available in universal, left or right contour and paediatric
- Telescoping frame from 47cm-68cm (Adult) and 39.5cm - 54cm (paediatric)
- OneTouch™ easy to adjust ROM hinge with lock-out capability
- Colour-coding and numbered frame for patient education
- Quick-fit, gripping buckles for easy application

REQUIRED MEASUREMENTS

- Circumference: 15cm above mid-patella

REBOUND® KNEE IMMOBILIZER UNIVERSAL

Rebound® Knee Immobilizer Universal features a universal 3-panel design that can be adjusted to accommodate most leg circumferences. With an MR* Conditional rating, patients can be safely scanned in an MR system, while maintaining immobilisation.

*See IFU for details.

INDICATIONS FOR USE

- Emergency immobilisation
- Pre- and post-surgical knee immobilisation
- Traumatic knee injuries

FEATURES AND BENEFITS

- Adjustable medial/lateral stays and rigid posterior stays provide motion restriction of the knee
- Universal 3-piece design simplifies inventory needs
- MR* Conditional: safely scan patients in an MR system while maintaining immobilisation
- Min thigh circumference: 26cm
- Max thigh circumference: 67.31cm

FORMFIT® PRO KNEE

Össur Formfit® Pro Knee is a compressive knee sleeve that features a SmartPad™ buttress for targeted support and cushioning. Our patented design realigns the patella, suitable for conditions such as Patella Tendonitis (Jumper’s Knee) and Chondromalacia Patella. The dynamic, 3-D MotionTech™ knit is supportive, meets certified medical grade compression requirements and has been proven to be superior to the leading brands at moisture wicking and breathability, keeping your knee cool during wear. Lightweight, removable spiral stays ensure optimum shape and fit, while distinct patella graphics make donning intuitive.

MotionTech™

CoolVent™

StayBilizer™

SmartPad™

INDICATIONS FOR USE

For knee conditions that may benefit from compression, such as;

- Patella tendonitis
- Chondromalacia Patella
- Mild sprains and strains
- Knee pain
- Feeling of instability

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- MotionTech™ for compression and dynamic fit with superior moisture wicking and breathability, keeping your knee cool during wear
- Certified medical grade compression (20-30 mmHg)
- Lightweight CoolVent™ knit in popliteal area for added breathability and comfort
- Patented SmartPad™ for targeted support and cushioning
- Patella graphics for intuitive placement
- Patented FoldLock™ system for easier and more secure application
- Lightweight, removable spiral steel stays

FORMFIT® KNEE HINGED

The Formfit Knee brace is for patients suffering from mild to moderate strains, sprains or ligament tears (ACL/PCL/MCL/LCL). It provides excellent stability, protection and compression during injury recovery. Made from strong and breathable materials it offers comfort while remaining highly durable. The open popliteal area reduces material bulging and potential irritation, while the malleable rigid hinge arms provide an intimate fit.

The Formfit Knee brace comes in either a wrap or a sleeve version.

INDICATIONS FOR USE

- Mild to moderate ACL and PCL tears
- MCL and LCL tears
- Combined mild knee sprains and strains
- Instabilities of the knee

FEATURES AND BENEFITS

- Breathable material
- Easy pull-on
- Malleable hinges
- Universal buttress
- Open popliteal area

REQUIRED MEASUREMENTS

- Knee circumference at mid-patella

ORDERING INFORMATION

FORMFIT® KNEE MCL

The Formfit Knee MCL provides external stability and protection for low to medium contact/impact activities and while recovering from injury. A unique, single hinged, hybrid wrap/sleeve design sets this brace apart from the competition. The lateral, range of motion hinge keeps the medial side free of obstruction. The Dynamic Force Strap aids in the resistance of valgus forces during knee extension, while the adjustable tibial strap improves suspension by minimising slippage.

INDICATIONS FOR USE

- Mild to Moderate Medial Collateral Ligament (MCL) sprains (Grade I and Grade II)

FEATURES AND BENEFITS

- Single, steel ROM lateral hinge (0° or 20° extension stop, 70° flexion stop)
- Dynamic Force Strap resist valgus forces
- Hybrid wrap/sleeve for easy application
- Adjustable tibial strap for improved suspension

REQUIRED MEASUREMENTS

- Knee circumference at mid-patella

FEATURES AND BENEFITS

- With 6 options to choose from, you can confidently meet the unique needs of any patient
- When you need to limit range-of-motion, our ROM hinge provides the control you need. When you don't, you can opt for a more streamlined, polycentric hinge
- ROM braces available in 12" or 16" Length
- A removable, universal buttress is included with every sleeve version of the Formfit Knee Brace for additional, customisable patella support, if necessary

REQUIRED MEASUREMENTS

- Knee circumference at mid-patella

C180™ ROCKET

≤18

With a condensed size and Accutrac™ hinges that are modified to more accurately track young knees, the lightweight C180 Rocket provides support for children with ligament instabilities.

INDICATIONS FOR USE

- For knee conditions that may benefit from increased AP and ML stability around the knee, such as: ACL, MCL, LCL, PCL, rotary and combined instabilities

FEATURES AND BENEFITS

- Anatomically-correct Accutrac® hinges with easy-to-use extension stops
- Semi-rigid frame consisting of woven carbon fibre infused with acrylic resin, is heat-mouldable for customisation

REQUIRED MEASUREMENTS

- Caliper measurement: Medio-laterally at joint width in a standard, weight-bearing position
- Circumference: Just below the distal border of the patella

MIAMI J®

Known as the superior c-spine immobiliser through multiple independent studies, the Miami J's patented design meets the specialised needs of individuals with cervical injuries. Bioengineered to minimise pressure points in key known areas: Chin, occiput, trapezius, and clavicle. Miami J offers features that enhance compliance, while providing immobilisation, inhibition of skin deterioration, and patient comfort.

INDICATIONS FOR USE

Situations requiring gross immobilisation of the cervical spine, these may include:

- Pre and post c-spine surgery
- C-spine precaution for trauma patients

FEATURES AND BENEFITS

- Sorbatex™ padding is antibacterial and clinically proven to inhibit microbial growth, which enhances comfort and helps assure patient compliance
- Comfort adjustment buttons for occiput and sternal pad is removable when supine, lying and swallowing
- MRI, CT and X-ray lucent, MR compatible

REQUIRED MEASUREMENTS

- Sizing based on 6 phenotypes to ensure correct fit and optimum immobilisation

Phenotype-driven sizing system makes size selection simple while drastically reducing margin of error in fitting a patient. Each collar has a bioengineered front with a specific back designed to work together for superior immobilisation. For paediatric sizing, please see Miami Jr in this catalogue.

MIAMI J® SELECT

The Miami J Select cervical collar by Össur offers the range of height adjustability in the market with a single, universal design that replicates the comfort, immobilisation and quality you expect from a Miami J product. Featuring a patented, first-to-market locking mechanism to encourage patient compliance and anti-microbial Sorbatex padding, Miami J Select is designed to support successful patient outcomes.

SPINE SOLUTIONS

INDICATIONS FOR USE

- Situations requiring gross immobilisation of the cervical spine, these may include:
- Pre and post c-spine surgery
- C-spine precaution for trauma patients

FEATURES AND BENEFITS

- Easy height adjustability with a tamper-proof locking mechanism – ‘Left to Lock’
- Anti-microbial & biocompatible Sorbatex™ padding prevents bacterial build-up
- Universal design that doesn’t compromise immobilisation or comfort
- 7 precise fitting sizes with opportunity to fine-tune
- Miami J® inspired chin tray
- One-piece, anatomically inspired collar back with Flex Edge® designed to reduce occipital pressure
- Easy to don and doff with patented Reproducible Fit option
- Intuitive blue Patient Touch-Points to send patients home with confidence – Blue is You™
- Simplified comfort adjustments with integrated and patented Sternal-Relief Dial
- Large tracheal opening – improved function for ICU patients
- Easy to clean and replace multi-coloured padding
- X-ray and CT lucent, MR-safe
- Compatible with Occian™ Back & Miami JTO® accessories

MIAMI JTO® THORACIC EXTENSION

The Miami JTO Thoracic Extension is designed in conjunction with leading spine surgeons, orthotists and nurses. The orthosis is used exclusively with all Miami J® collars when even greater stability at the cervical junctions is indicated.

Miami JTO Thoracic Extension is a versatile, tool-free device with a patented chin strut, providing more control than a collar alone can provide, designed to treat cervical and high-thoracic injuries.

INDICATIONS FOR USE

- Low c-spine and high t-spine precaution for trauma patients
- Immobilisation for pre and post low c-spine and high t-spine surgery
- Other conditions requiring gross immobilisation of the low-cervical and/or high-thoracic-spine
- Conditions requiring gross immobilisation of the low cervical and/or high-thoracic-spine

FEATURES AND BENEFITS

- Patented design with 'floating back' permits maximum immobilisation without the risk of compensatory motion
- Snap on and off without tools
- Sorbatex™ II padding is antibacterial and clinically proven to inhibit microbial growth, which enhances comfort and helps assure patient compliance
- MRI, CT and X-ray lucent

REQUIRED MEASUREMENTS

OCCIAN® BACK

≤18

The Occian Back is designed exclusively for the specialised needs of multi-system trauma patient in the ICU. Universally sized, specifically engineered and designed with advanced, Intuitech™ pressure-relief memory foam, the Occian Back helps caregivers manage c-sp patients who are at high risk of occipital breakdown.

SPINE SOLUTIONS

INDICATIONS FOR USE

- Patients not awake and alert within 24 - 48 hours after admission
- Patients with pre-existing skin injuries and/or lacerations to the head/neck
- Burn patients who must wear a collar
- Elective surgery patients desiring night time post-operative comfort

FEATURES AND BENEFITS

- Intuitech pressure relieving memory foam
- Maintains c-spine stability
- Provides unique pressure-relieving comfort by replacing the back section of a Miami J Collar.
- Easy to clean
- MRI, CT and X-ray lucent

REQUIRED MEASUREMENTS

MIAMI Jr®

≤18

Miami Jr is engineered to fit the unique anatomies of patients aged 12 and under. The Miami Jr line, which spans the growth cycle, is sized according to age. Össur is the only company that has a paediatric line of collars based on the anatomical differences between adults and children. We realise that children are not just “little adults” - they require innovative design.

INDICATIONS FOR USE

Situations requiring gross immobilisation of the cervical spine, these may include:

- pre and post c-spine surgery
- c-spine precaution for trauma patients

FEATURES AND BENEFITS

- Designed exclusively for children 12 years and under
- Sorbatex™ II pads make the collar “skin friendly” and protect skin integrity during extended wear
- MRI, CT and X-ray lucent, MR compatible

PHILADELPHIA® ADJUSTABLE TRACHEOTOMY COLLAR

Philadelphia tracheotomy collars have been an industry standard for decades. Philadelphia Adjustable is constructed from the same high-quality materials as the original, and combines convenient size adjustability with immobilisation and comfort.

INDICATIONS FOR USE

Situations requiring gross immobilisation of the cervical spine, these may include:

- Pre and post c-spine surgery
- C-spine precaution for trauma patients

FEATURES AND BENEFITS

- Circumference adjustable and height adjustable with permanent lock
- Anatomically shaped Plastazote® foam leaving clearance for cervical veins
- Well ventilated and water-resistant for bathing and hydro-therapy
- MRI, CT and X-ray lucent, MR compatible

REQUIRED MEASUREMENTS

- Universal, one size

Description	Part#
Philadelphia Adjustable Tracheotomy Collar	PHP-AA

PHILADELPHIA® TRACHEOTOMY COLLAR

≤18

The Philadelphia Tracheotomy Collar is a hospital and rehabilitation collar that is designed to maintain neutral alignment of the cervical spine after injury to the neck. The collar contains a large tracheal opening, allows carotid pulse monitoring and emergency tracheotomies.

INDICATIONS FOR USE

- C-spine precaution for trauma patients
- Immobilisation for pre c-spine surgery
- Other conditions requiring gross immobilisation of the mid-cervical spine

FEATURES AND BENEFITS

- Anterior and posterior rigid plastic reinforcement supports limit movement
- Total cervical arch support maintains neutral alignment of the cervical spine
- Water-resistant for bathing and hydro-therapy
- Easily customised for individual requirements
- Does not contain natural rubber latex, non-toxic and hypoallergenic Plastazote® foam reduces skin irritation

REQUIRED MEASUREMENTS

- Neck circumference and height from tip of chin to sternal notch

NECLOC®

INDICATIONS FOR USE

Situations requiring gross immobilisation of the cervical spine, these may include:

- Pre and post c-spine surgery
- C-spine precaution for trauma patients

FEATURES AND BENEFITS

- Ergonomic two-piece clamshell design and retaining strap secure flexion during application
- Five unique phenotype-driven sizes make it easy to select the correct size
- Minimal manipulation of patient during application
- X-ray and CT lucent. MR safe

REQUIRED MEASUREMENTS

- Sizing based on 5 phenotypes to ensure correct fit and optimum immobilisation

SIZING

- Phenotype-driven sizing system makes size selection simple while drastically reducing margin of error in fitting a patient. Each collar has bioengineered size specific front and back sections designed to work together for superior immobilisation. For paediatric sizing, please see NecLoc Kids.

MIAMI LSO®

Miami LSO is a spinal orthosis designed for pain relief, protection of injured ligaments or muscles and post-surgical immobilisation. It provides low-profile, anatomical immobilisation, easy fit and wear, options for modular support and an advanced pulley system with a length-adjustable pulley cord.

INDICATIONS FOR USE

Conditions requiring gross immobilisation of the trunk in the lumbar region such as:

- Stable non-displaced spinal fractures (L1-L5)
- Spinal Stenosis
- Herniated Disks
- Degenerative Spinal Pathologies
- Spondylolysis
- Spondylolisthesis

FEATURES AND BENEFITS

- Slim, breathable material
- Proven Miami double-pulley system with length-adjustable pulley cord
- Intuitive fitting without trimming with fold-over belt arms & Precise-Size™ landmarks
- Optional fit tool for perfect fitting directly on the patient
- Universal belt sizing accommodates waists up to 178cm
- New Universal Posterior panel to accommodate more patients with less inventory
- Contoured posterior panels sized S-XL for a precise, anatomical fit
- Quick-Fit pocket enclosure and blue highlights for patient ease of use

REQUIRED MEASUREMENTS

- Waist circumference

MIAMI TLSO 464

The Miami TLSO from Össur directly addresses the needs of patients and practitioners, simplifying preparation without compromising on fit or performance. This easy-to-use pre-assembled Miami TLSO brace offers three configurations in one.

Compliance: Easily applied in over the shoulder or underarm configuration, donning and doffing is further simplified with the conveniently located quick release buckles.

Adjustability: The universal belt designs allows for setting the belt length on the patient for a more accurate sizing experience.

Comfort: Truly shaped to fit the anatomy, the anatomically contoured design better immobilises the spine while maximizing patient comfort.

Ease of Use: The Miami TLSO brace requires minimal preparation and is designed to provide optimal patient comfort.

INDICATIONS FOR USE

Conditions requiring gross immobilisation of the thoracic and lumbar spine. Such conditions may include:

- Post-surgical immobilisation
- Spinal support TLSO attachment is up to T7
- Spinal stenosis
- Herniated disc
- Degenerative spinal fractures
- Spondylolithesis
- Spondylolysis

CONTRAINDICATIONS

- Unstable, displaced fractures

FEATURES AND BENEFITS

- Significantly superior comfort and ease of donning/doffing
- Fully assembled for fitting with ease
- Accommodates heights 155-193cm
- Posterior thoracic extension option with ergonomic axillary strapping
- Step-down to an LSO as one progresses through rehabilitation
- One-touch telescoping anterior-thoracic extension option with single or double-hinge
- The convenience of a one-size Universal or individualise with a uniquely-sized anatomical design
- Improve comfort and immobilisation with multiple strapping configurations and removable anchors

REQUIRED MEASUREMENTS

- Waist circumference

MIAMI LUMBAR® POSTEO

Designed with patient comfort and compliance in mind, the Miami Lumbar Posteo provides functional relief of vertebral fracture pain, and facilitates return to mobility. The lumbar compression system offers both pain relief via active vertebral offloading and better grip of patient's hips for greater ease of use and compliance. The Miami Lumbar Posteo includes an innovative approach to ease of use and consistent donning.

INDICATIONS FOR USE

- Back pain caused by stable vertebral compression fractures (VCF)
- Post-operative immobilisation

FEATURES AND BENEFITS

- Active offloading via thoracic extension and lumbar compression
- Integrated pulley system for customised fit
- Trimmable axillary straps with adjustable tension for optimal stabilisation
- Cold-moldable aluminum PTE to fit different anatomies
- Extra cushioning around the aluminum strut for minimised skin pressure

REQUIRED MEASUREMENTS

- Back length measured from the top of the sacrum up to C7 vertebrae, following the spinal curvature

SIZING

Please note that the Miami Lumbar Posteo includes a universal lumbar belt which can be trimmed down to the appropriate size.

FORMFIT® PRO BACK

Össur Formfit® Pro Back provides relief for patients suffering from pains and strains in the lower back. Manufactured with our dynamic, 3D-Motion Tech™ knitting technology, our belts feature superior moisture wicking capabilities and are highly breathable. The patented back panel design utilises our StayBilizer™ technology to provide optimum shape and fit, while conveniently placed finger loops make donning easy. The SmartPad™ provides a targeted support and cushioning and can be removed if desired.

MotionTech™

CoolVent™

StayBilizer™

SmartPad™

INDICATIONS FOR USE

- For lower back conditions that may benefit from compression and gross motion restriction, such as:
- Lower back pain (Lumbago)
- Lumbosacral sprain/strain
- Degenerative joint/disc disease

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- MotionTech™ for compression and dynamic fit
- Removable lumbar SmartPad™ for targeted support and cushioning
- Lightweight, malleable aluminum stays are shaped to the anatomy of the lower back

REQUIRED MEASUREMENTS

- Measure waist circumference

FORMFIT® BACK SUPPORT AIR

The Form Fit Back Support with Air provides compression and support for those suffering from lower back pain. The integrated pneumatic system is intuitive and conveniently located so that adjustments can be made as demands on the body change throughout the day. The double wrap design improves compression, while durable finger loops make applying the brace easy. Made from breathable materials, the Form Fit Back Support provides compression and support for those suffering from lower back pain. The double wrap design improves compression, while the durable finger loops make applying the brace easy.

INDICATIONS FOR USE

Lower back conditions that may benefit from gross motion restriction, such as;

- Muscular low back pain
- Lumbosacral strains
- Chronic low back pain
- Sciatica

FEATURES AND BENEFITS

- Self-contained pneumatic system is low-profile and easy to use
- Mesh panels and ventilation holes increase breathability and enhance comfort
- Overlapping double pull strap design provides additional support to the lumbar and abdominal areas
- Flexible stays provide optimum support in the lumbar and abdominal areas
- Gripper strips prevent migration
- Adjustable air bladder provides a custom fit and offers focused compression in the lumbar area

Gel pad	GB28

FORMFIT® BACK SUPPORT

Made from breathable materials, the Formfit Back Support provides compression and support for those suffering from lower back pain. The double wrap design improves compression, while the durable finger loops make applying the brace easy

INDICATIONS FOR USE

- Muscular low back pain
- Lumbosacral strains
- Chronic low back pain
- Sciatica

FEATURES AND BENEFITS

- Anti-migration system reduces slippage
- Double wrap design improves compression
- Finger loops for easy application
- Hot/Cold Gel pad available separately

REQUIRED MEASUREMENTS

- Waist circumference

HIP

HIP
SOLUTIONS

TABLE OF CONTENTS

HIP	93
REBOUND® HIP	95
UNLOADER® HIP	97

REBOUND® HIP

Rebound Hip delivers gentle controlling forces and effective functional ROM restriction in extension / flexion and abduction / adduction to promote optimal post-surgical outcomes. The low profile, lightweight design supports patient comfort and compliance. The universal frame and softgood are easy to stock, assemble and quickly fit.

HIP SOLUTIONS

INDICATIONS FOR USE

Hip conditions that could benefit from motion restriction such as:

- Postoperative after (total) hip arthroplasty
- Postoperative after revision of (total) hip arthroplasty
- Postoperative hip arthroscopy
- Post-op following FAI arthroscopic surgery
- Post-op following gluteus medius repair surgery
- Post-op following hamstring repair surgery
- Inoperable hip abnormalities
- Preventively when there is risk of hip dislocation
- Conventional treatment after dislocation/reduction

FEATURES AND BENEFITS

- Low-profile, lightweight design that supports patient comfort and compliance
- Quick-release pegs easily adjust the desired range-of-motion needed for the patient's optimal rehab
- Quick-fit with sliding mechanism on frame to adjust for patient's height
- Optional, adjustable ROM hinge enables adduction/abduction from 0° to 10°, 20° or 30°
- OR kit offers patient protection of ankle and perineum skin during intraoperative traction on a surgical table

REQUIRED MEASUREMENTS

- Circumference at iliac crest height
- Length from greater trochanter to mid patella

UNLOADER® HIP

Unloader Hip is designed to improve activities of daily living by optimizing load dispersion for patients suffering from mild and moderate osteoarthritis of the hip, thus contributing to hip stability and improved mobility.

Unloader Hip delivers proprioceptive support during the gait cycle by providing compression with a proven pulley system design. If required it can decrease the internal rotation and adduction moment with its unique and clinically proven Dynamic Rotation Straps™.

HIP SOLUTIONS

INDICATIONS FOR USE

Conditions benefitting from hip repositioning and/or compression around the greater trochanters, this may include:

- Hip osteoarthritis (OA)
- Femoroacetabular impingement (FAI)
- Labrum tears

FEATURES AND BENEFITS

- The Dynamic Rotation Straps with SmartDosing dial allows individual adjustment of the external rotation force, to achieve optimum pain relief for each patient
- Easy donning and doffing thanks to pocket wrap closure system and zipper
- Pulley system for improved stability
- Premium quality Lycra® for breathability and a snug fit

REQUIRED MEASUREMENTS

- Measure the hip circumference at the anterior superior iliac-spine.

FORMFIT® SHOULDER BRACE

The Formfit Shoulder Brace is designed to provide immobilisation following shoulder injury/surgery. With its streamlined fit, sporty look and breathability it offers excellent comfort and ease of use. Same as its predecessor, the SmartSling®, the Formfit Shoulder Brace also provides abduction of the shoulder (when the abduction pillow is attached), or external rotation of the shoulder (when the external rotation pillow is attached).

Optional axilla pillow helps distribute weight over a larger surface area.

INDICATIONS FOR USE

- Immobilisation for rotator cuff repairs
- Bankart repairs
- Capsular shifts
- Glenohumeral dislocations/subluxations
- Soft tissue repairs/strains
- Shoulder instabilities/injuries
- Post-surgical rehabilitation

FEATURES AND BENEFITS

- Breathable material
- Quick-release buckles
- Offloading strap
- Extra padding
- Universal thumb loop

REQUIRED MEASUREMENTS

- Olecranon to end of closed fist

FORMFIT® PRO ELBOW

Formfit® Pro Elbow provides relief from elbow pain. This 3D compressive elbow sleeve is manufactured using our MotionTech™ technology and features two integrated epicondyle SmartPads™ for more targeted support and cushioning. The RadialStrap™ provides additional compression and support.

MotionTech™

CoolVent™

SmartPad™

FoldLock™

INDICATIONS FOR USE

- For elbow conditions that may benefit from compression, such as:
- Medial and lateral epicondylitis
- Elbow pain and swelling

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- 3D MotionTech™ for compression and dynamic fit keep
- Epicondyle SmartPads™ for targeted support and cushioning
- Patented FoldLock™ system for easier and more secure application
- RadialStrap™ for increased compression and support

REQUIRED MEASUREMENTS

Measure arm circumference exactly at the elbow. Elbow in full extension.

ORDERING INFORMATION

XL	29 - 32cm	FP300005

REBOUND® POST-OP ELBOW

The Rebound® Post-Op Elbow brace by Össur combines intuitive features for fitters and users with a design that aims to improve the post-op experience. The industry's only elbow immobiliser that combines a drop-lock hinge and four telescoping paddles, individual post-op protocols are easily catered for. The Rebound Post-Op Elbow, lightest of its kind, promotes user comfort with straps that stay in place, anatomical left and right fit with mouldable stability cuffs and blue patient touch-points for easy education.

INDICATIONS FOR USE

Indications requiring elbow immobilisation and/or range of movement restriction. This may include:

- Stable fractures of the elbow, distal humerus, proximal radius or ulna
- Tendon and ligament injuries or repairs
- Collateral ligament reconstructions
- Elbow hyperextension
- Triceps tendon repair
- Chronic elbow injuries
- Tennis elbow release

FEATURES AND BENEFITS

- Designed to be the most lightweight brace on the market
- Telescoping paddles relocate to individualise length and keep incision sites clear
- Easy education for users with intuitive patient touchpoints, including Blue is You™ buckles and numbered strapping system
- Drop-Lock hinge enables secure range of movement with bump-resistant pull adjustment stops and optional ROM lock-outs
- Mouldable stability cuffs designed to be individually customised for improved fit and support
- Strap guides maintain strap location for added security and comfort
- Universal fit for both left and right elbows

REQUIRED MEASUREMENTS

- Universal, one size

FORMFIT® TENNIS ELBOW

Formfit Tennis Elbow is made with a patented, ergonomically-shaped plastic. There are two blue cushions with ribbed surface on each side that reduce traction on the tendons. The durable design and materials enable everyday use for both work and athletic activities.

INDICATIONS FOR USE

- Tendonitis of the elbow
- Prevention during work, daily life and sport
- Epicondylitis

FEATURES AND BENEFITS

- Adjustable strap
- Patented ergonomically-shaped plastic eliminates tourniquet effect associated with traditional designs.
- Twin blue cushions provide counterforce, reducing traction on the tendons and thus inflammation
- Ribbed surfaces reduce vibration to the tendon, increasing comfort
- Durable design and materials enable everyday use for both work and athletic activities

REQUIRED MEASUREMENTS

- Circumference of the elbow

ORDERING INFORMATION

Size	Circumference	Part#
S	22 - 26cm	B-247000002

EXOFORM® WRIST

INDICATIONS FOR USE

- Carpal tunnel syndrome
- Tendonitis
- Mild to moderate sprains & strains
- Rheumatoid arthritis/osteoarthritis
- Post-cast healing injuries
- Bursitis

FEATURES AND BENEFITS

- Ergonomically contoured on the inside of the brace provides the best fit and most comfort
- Rigid plastic supports contour to the hand and wrist at the top and bottom leading to greater support and immobilization
- Adjustable aluminum palmar stay allows for fine-tuning when needed

REQUIRED MEASUREMENTS

- Wrist circumference

ORDERING INFORMATION

XL	23.5 - 25.5cm	507088	507078

EXOFORM® CARPAL TUNNEL WRIST

INDICATIONS FOR USE

- Carpal tunnel syndrome
- Tendonitis

FEATURES AND BENEFITS

- Lightweight low profile design
- 20% less circumferential bulk than other brands
- More room at base of the thumb, palmar crease and 5th MP for full MP flexion
- Contoured for an anatomically correct fit
- Designed to provide smooth controlled resistance to extreme range of motion
- Preshaped into a neutral position for comfortable limited motion/ flexibility
- Provides radial and ulnar styloid relief
- “Soft touch” web space is cushioned and 40% thinner than other brands
- Interior is 3-dimensionally molded to enhance comfort

REQUIRED MEASUREMENTS

- Wrist and palm circumference

FORMFIT® PRO WRIST

Formfit Pro Wrist is constructed using our superior signature 3D MotionTech knit, and ideal for injuries that may benefit from compression. Malleable aluminum stays can be adjusted to conform to an individual's anatomy. CoolVent™ technology in the basal thumb area enhances breathability and comfort.

MotionTech™

CoolVent™

StayBilizer™

FoldLock™

INDICATIONS FOR USE

- For wrist conditions that may benefit from compression, such as:
- Rheumatoid Arthritis (RA) and other chronic pain conditions
- Wrist sprain and strains
- Overuse and pain conditions
- Wrist tendonitis

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

FEATURES AND BENEFITS

- MotionTech™ for compression and dynamic fit has been proven to be superior to the leading brands at moisture wicking and breathability, keeping patients cool during wear
- Malleable aluminum stay for a customised fit
- CoolVent™ technology in thumb base area for extra breathability and comfort

REQUIRED MEASUREMENTS

Measure wrist circumference at the level of the radial styloid with the hand outstretched. Wrist in 0 degrees of flexion.

WRIST / THUMB BRACE

A simple yet effective wrist brace offering superior comfort.

INDICATIONS FOR USE

- Stabilising hyper-or hypotonic wrist/thumb flexors
- Wrist / Thumb over use injury
- Wrist / Thumb trauma

FEATURES AND BENEFITS

- Simple touch-and-close fastenings
- Full length malleable aluminium thumb stay

REQUIRED MEASUREMENTS

- Wrist circumference

ELASTIC THUMB SPICA

The Elastic Thumb Spica is designed to protect the thumb from unwanted motion whilst allowing full range of motion of the fingers. Made from elastic, Thumb Spica is simple and very easy to fit. The thumb spica is designed to restrict movement of the thumb post injury, such as a broken thumb, which aids in the recuperation process. It also offers moderate and flexible control following CMC ligament sprains or strains.

KEY BENEFITS:

Constructed from elastic, simple design with spiral thumb stay, restricts movement of first MCP and CMC joints, touch-and-close fastenings

INDICATIONS FOR USE

- CMC ligament sprains or strains requiring moderate, flexible control

SPECTRA® WRIST BRACE

The Spectra wrist brace is designed to immobilise the wrist at a neutral angle. Its single-pull lacing closure makes it easier to apply than a conventional wrist brace, meeting the needs of patients with arthritis and other hand dexterity issues.

INDICATIONS FOR USE

- Mild to moderate sprains and strains
- Tendonitis
- Carpal tunnel and other repetitive stress injuries
- Post cast healing

FEATURES AND BENEFITS

- Wicking liner moves moisture away from the skin for increased comfort
- Single-pull lace closure enables easy application
- Adjustable webspace strap allows size adjustment for increased comfort
- Removable/adjustable palmar stay provides adjustability of immobilisation angle
- Suede soft good material is durable and breathable

REBOUND® DIABETIC WALKER

Offloading has proven to be a key factor in foot ulcer treatment and entails reducing pressure of the plantar area in general and the ulcer site in particular.

The Rebound Diabetic Walker is uniquely designed for effective treatment of plantar foot ulcers, with easy access and re-fitting during wound care, while improving the patient's mobility during the healing process.

The Rebound Diabetic Walker has major advantages over diabetic shoes and shoe inserts in its healing effectiveness and over total contact casting due to its ease of use, speed of application and low cost.

FUNCTIONAL HEALING - WHERE MOBILITY MEANS RECOVERY

INDICATIONS FOR USE

- Plantar foot ulcers and wound prevention

FEATURES AND BENEFITS

- Effective tri-laminate insole with removable shock-absorbing hexagons that promote ulcer offloading and a Plastazote, heat-moldable top layer that evenly distributes the pressure and minimises friction
- Unique pressure relief valve for preventing over-inflation, while balancing compression with customised fit
- Positioning Portals allow the clinician to check the fit of the walker at the heel bottom, in order to ensure appropriate positioning of the foot in the walker
- Anatomically designed shell that minimises shear forces by immobilising the foot and ankle at 90 degrees while providing protection
- Flex Edge® technology for relief of pressure points
- Rocker Bottom outsole for a smooth roll over while allowing for individual natural toe out
- Soft and breathable, low friction, machine washable liner for hygiene promotion and prevention of infection
- Tamper evident strapping for compliance monitoring

DH OFFLOADING WALKER®

Assists in the healing of plantar ulcers with a patented pressure relief insole

INDICATIONS FOR USE

- Treatment of plantar ulcers

FEATURES AND BENEFITS

- Shear force reduction by stabilising foot and ankle at 90°
- Wide low profile rocker bottom provides a smooth roll-through and increased stability for altered gaits
- Designed around Össur's unique Active Offloading Insole
- The softgood's patented inner bootie prevents the foot from migrating on the insole
- Provides a safe environment for the simultaneous use of wound care material
- Create an Instant TCC using a single roll of cast tape for patient compliance

REBOUND® AIR WALKER

Rebound Air Walker is a circumferential walker with fully integrated air pump and release valve that provides easy, tool-free inflation and deflation for fine-tuned, consistent compression. It features a host of details designed to provide added protection, simplified application and usage.

INDICATIONS FOR USE

Foot and ankle conditions that may benefit from motion restriction, such as:

- Grade 2 and 3 ankle sprains
- Stable fractures
- Tendon or ligamentous sprain
- During postoperative or rehab phase. If used with the Achilles Wedge Kit, Achilles ruptures can be treated as well.
- Rebound Air Walker Low Top
- Foot and ankle conditions that may benefit from motion restriction, such as:
- Stable foot fractures
- Tendon or ligamentous sprain
- During postoperative or rehab phase.

FEATURES AND BENEFITS

- Linked medial and lateral air bladders with a single inflation point provide balanced compression and are shaped to cradle the Achilles, holding the heel in place
- Rocker bottom promotes a natural, stable gait, while a trimmable, semi-soft toe bumper provides added protection
- Moisture-wicking softgood helps keep skin dry and comfortable
- Straps fasten in front for easy application, adjustment and removal
- EVA material provides greater shock absorption in the heel
- Fully-integrated air pump and release valve provides easy, tool-free inflation and deflation for fine-tuned, consistent compression
- Flex Edge™ overmolding conforms to each patient's unique anatomy to help limit the formation of pressure points
- Ventilated panels wick moisture to prevent microbial buildup and improve patient comfort

FORMFIT® WALKER AIR

The Formfit Walker Air provides immobilisation for patients suffering from soft tissue injury; grades 2 & 3 strains and sprains, and stable fractures. The patented pneumatic system is designed to increase stability while decreasing pain and swelling. The intuitive pump and clearly marked decompression valve make air/pressure adjustments easy.

INDICATIONS FOR USE

For foot and ankle conditions that may benefit from motion restriction, such as:

- Grade 2 and 3 ankle sprains
- Stable fractures
- Soft tissue injuries
- During postoperative or rehab phase

FEATURES AND BENEFITS

- Available in low top or standard height
- Integrated pneumatic system
- Low, wide rocker bottom promotes a stable, natural gait
- Shock absorbing sole for reduced impact at heel strike
- Breathable, seamless liner

PAEDIATRIC WALKER

≤18

Paediatric Walkers are designed to stabilise and protect the lower leg, ankle and foot. They are easy to operate and comfortable to wear, making them ideal for an active child who requires stability following a sprain, stress fracture, or surgery.

INDICATIONS FOR USE

- Soft tissue injuries
- Grade 2 and 3 sprains
- Stable fractures
- Post-operative ankle stabilisation
- Trauma and rehab use

FEATURES AND BENEFITS

- High quality rigid outer skeleton for protection
- Dense foam lining within the sole to provide comfort and support
- Shock absorbing sole to improve comfort and protects the user from slips, providing additional security in each step
- Uprights give additional stability by restricting motion of the leg
- Lightweight design perfectly designed for kids to keep active

AFO DYNAMIC

The AFO Dynamic provides a strong, lightweight solution for patients with varying degrees of drop foot secondary to a variety of neurological conditions. Össur has taken the carbon fibre technology from its Flex-Foot® product and incorporated it into the new AFO Dynamic to provide increased support over traditional ankle foot orthoses. The energy storing properties of carbon fibre make it an ideal material for this dynamic ankle foot orthosis because it provides real energy return. For those people leading busy lives, the AFO Dynamic will ensure a more efficient walk for the user.

INDICATIONS FOR USE

Drop foot secondary to:

- Cerebro Vascular Accident (CVA)
- Other neurological conditions
- Multiple Sclerosis
- Mild knee instability
- Charcot Marie Tooth disease (HMSN)

Contraindications:

- Severe ankle - foot deformities
- Fluctuating oedema
- Severe spasticity
- Neuropathy

FEATURES AND BENEFITS

- Carbon fibre design provides excellent strength-to-weight ratio and dynamic motion
- The tapered carbon heel stores energy and manages forces at heel strike
- Full-length toe lever provides full support while foot is loaded, as well as reduced shock to the contralateral limb
- Creates medio-lateral stability at mid-stance
- Reduces energy consumption by reducing hip hike
- Medial strut makes it less visible in shoe
- Open anterior tibia shell provides superior anatomical fit, and reduces heat and perspiration
- Weight limit: 120 kg

REQUIRED MEASUREMENTS

- Shoe size
- Calf height at widest part of the calf

AFO LIGHT

AFO Light provides support only where it is needed, eliminating unnecessary bulk and providing a cosmetically-appealing look. Using the best of Flex-Foot® technology and the energy storing properties of carbon fibre, AFO Light offers a strong and lightweight solution for people with mild to moderate drop foot.

INDICATIONS FOR USE

- | | | |
|---|--|---|
| Drop foot secondary to: | <ul style="list-style-type: none"> • Charcot Marie Tooth disease (HMSN) • Lower extremity overuse injuries | Contraindications: |

FEATURES AND BENEFITS

- Energy return and propulsion assistance of the limb at toe off
- Supports the foot for ground clearance during swing phase
- Carbon fibre design provides excellent strength-to-weight ratio and dynamic motion
- Gradual plantar flexion at initial contact
- Stiffness gradient at heel and the toe correspond to ground reaction forces as they are applied to the foot
- Easy to don and doff
- Weight limit: 100kg

AFO LEAF SPRING

AFO Leaf Spring is a pre-fabricated polypropylene ankle-foot orthosis designed to support flaccid drop foot. It provides a semirigid section for toe clearance and support, yet has a thin, flexible foot plate for easy trimming. The absence of a heel section makes the Leaf Spring more comfortable to wear and provides a better fit in shoes.

INDICATIONS FOR USE

- Drop foot
- Mild drop foot secondary to other neurological pathologies

FEATURES AND BENEFITS

- Injection molded polypropylene is lightweight
- Variable thickness throughout the orthosis provides strength
- Provides good toe clearance and support
- Thin, flexible foot part is easy to trim with a pair of scissors
- Excellent fit for most types of shoes
- Absence of heel section for improved comfort

REQUIRED MEASUREMENTS

- Shoe size

ORDERING INFORMATION

Size	Shoe Size UK	Shoe Size EU	Height	Left	Right

PROLITE AFO

Comfortable, low profile prefabricated leaf spring design to correct flaccid foot drop, especially on post-stroke patients. Injection moulded polypropylene allows for different thicknesses throughout the orthosis — thicker on the vertical aspect for rigidity, thinner footplate for ease of trimming, comfort and flexibility.

INDICATIONS FOR USE

- Drop foot
- Mild drop foot secondary to other neurological pathologies

FEATURES AND BENEFITS

- Injection-moulded for a high quality finish
- Easily trimmed footplate
- May be heat modified for minor fitting adjustments

REQUIRED MEASUREMENTS

- Foot length

REBOUND FOOT-UP®

Rebound Foot-Up is a lightweight ankle/foot orthosis (AFO) that offers dynamic support for drop-foot or related disorders that require dorsiflexion support. The Rebound Foot-Up supports the ankle dorsiflexion during swing phase. Dynamic support is provided by an elastic strap connected to the shoe by either a transparent plastic inlay placed between shoelaces, or by a nut and bolt fastened through the eyelets. The positioning of the fastening allows for individualising the support by providing the option of positioning the dorsiflexion support on the medial or lateral side. When using the plastic inlay, the dorsiflexion support becomes neutral.

The Rebound Foot-Up Ankle Cuff has a smart clamp that holds the cuff in place and facilitates one-handed donning and doffing.

Optional: Rebound Foot-Up Foot Wrap can be used when barefoot or in open shoes or sandals. The adjustable elastic strap is attached to the Foot Wrap using a nut and bolt fastened through the eyelets.

INDICATIONS FOR USE

- Drop-foot
- Disorders that require dorsiflexion support

FEATURES AND BENEFITS

- Dynamic and discreet support for drop-foot or related disorders that require dorsiflexion support
- Improved function, ease of use, comfort, and quality
- Allows for voluntary plantar flexion
- The elastic strap is adjustable and easily replaceable
- The Rebound Foot-Up Ankle Cuff and Rebound Foot-Up Foot Wrap are made from breathable material that can be worn comfortably for long periods of time
- The Rebound Foot-Up is hand-washable
- Positioned medial or lateral support
- Contoured to the shape of leg
- Adjustable strap length
- Smart clamp facilitates one-handed donning / doffing
- Optional Rebound Foot-Up Foot Wrap can be used without shoes or in open shoes or sandals

REQUIRED MEASUREMENTS

- Circumference of ankle, measured around the malleoli

FOOT-UP®

Foot-Up is a lightweight AFO that offers dynamic support for drop foot or similar complaints. The orthosis provides visible improvement in gait by supporting the foot the moment it is raised.

INDICATIONS FOR USE

- Drop foot
- Support of dorsiflexion

FEATURES AND BENEFITS

- Streamlined, lightweight and invisible when worn
- Breathable material, padded and comfortable to wear
- Easy to fit
- Available in black and beige
- Attached to the shoe, or available as shoeless model

FORMFIT® PRO ANKLE

Össur Formfit® Pro Ankle is a compressive ankle sleeve with 2 integrated malleoli pads, designed to be worn after mild ankle injuries. The dynamic 3-D MotionTech™ knit is supportive and meets certified medical grade compression requirements. Proven superior to leading brands for moisture wicking and breathability, your ankle stays cool during wear. CoolVent™ technology in the area in front of the ankle further enhances breathability and comfort.

MotionTech™

CoolVent™

SmartPad™

FoldLock™

INDICATIONS FOR USE

- For ankle conditions that may benefit from compression, such as:
- Ankle injury rehabilitation
- Mild sprains and strains
- Mild instability

CONTRAINDICATIONS

- Must not be used by individuals for whom compression is contraindicated.

REQUIRED MEASUREMENTS

Measure ankle circumference diagonally over the base of the heel and across the ankle bone. Ankle in 90 degrees.

Size	Ankle circumference
XS	18 - 20cm
S	20 - 23cm
M	23 - 26cm
L	26 - 29cm
XL	29 - 32cm

FEATURES AND BENEFITS

- MotionTech™ for compression and dynamic fit with superior moisture wicking and breathability, keeping your ankle cool during wear
- Certified medical grade compression (20-30 mmHg)
- CoolVent™ technology in the area in front of the ankle for added breathability and comfort
- 2 integrated malleoli SmartPads™ for targeted support and cushioning
- Patented FoldLock™ system for easier and more secure application

FORMFIT® ANKLE BRACE

The Formfit Ankle brace provides stability and protection for the ankle – whether used prophylactically, for chronic instability or following an injury. A hybrid between a rigid ankle stirrup and a soft ankle support, the Formfit Ankle ensures a close fit which limits inversion, eversion, flexion and extension movements. The low profile design fits easily into shoes and the quick lace up feature makes it easy to don and doff. Breathable material ensures it can be comfortably worn all day. The Formfit Ankle with Figure 8 strap version, offers an even greater level of support, by further limiting the range of motion of the ankle.

INDICATIONS FOR USE

- Ankle injury rehabilitation/immobilisation (Grade I/II sprains)
- Support chronic instability
- Prophylactic use

FEATURES AND BENEFITS

- Breathable material
- Quick lace Up
- Inversion/Eversion Control
- Figure 8 strap version

REQUIRED MEASUREMENTS

- Measure ankle circumference diagonally over the base of the heel and across the ankle bone.

FORMFIT® ANKLE STIRRUPS

≤18

Formfit Ankle Stirrups are lightweight and sturdy. Whether worn to accommodate an acute injury, chronic instability, or post-cast healing, Formfit Ankle Stirrups stabilise injured ankles by restricting the inversion/eversion motion. The universal design has been carefully engineered to accommodate the malleoli on both sides and ensures a great, comfortable fit. The slip resistant heel strap can be adjusted to accommodate most ankles. Our signature Flex-Edge™ overmould surrounds the stirrup's outer shell protecting patient's skin from any hard edges, further adding to a comfortable fit. The universal stirrup design is available with three different liner options: inflatable air, gel, or foam, offering each patient a solution that best fits their needs.

INDICATIONS FOR USE

Situations requiring inversion/eversion restriction. These may include:

- Mild to severe ankle sprains
- Chronic ankle instability
- Post-cast and post-walker support
- Ankle injury rehabilitation and/or post-surgical use

FEATURES AND BENEFITS

- Universal shell, carefully crafted to fit both right and left ankles
- Soft Flex-Edge overmould for increased comfort
- Adjustable heel strap to optimise patient fit and comfort
- Slip-resistant silicone dots to reduce slipping and stabilise the foot inside of shoe
- 2 bidirectional hook and loop straps ensure a secure and stable fit
- Choice of inflatable, foam, and gel liners to suit your needs
- Available in Adult and Youth sizes

REQUIRED MEASUREMENTS

- Patient's height

EXOFORM® DORSAL NIGHT SPLINT

INDICATIONS FOR USE

- Plantar fasciitis
- Post-static pain
- General heel pain
- Drop foot
- Achilles tendonitis
- Lower extremity overuse injuries

FEATURES AND BENEFITS

- Adjustable aluminum stay inside dorsal shell allows modification in the angle of dorsiflexion
- Soft, overmolded edges enhance comfort
- Hinged shell at the calf area prevents brace rotation
- Semi-rigid plantar pad reduces discomfort along the sides of the foot while providing an improved angle of dorsiflexion
- Non-slip surface on plantar pad prevents slipping during normal walking
- Circumferential heel and posterior strapping prevents migration while increasing overall comfort and effectiveness
- Strapping and shell perforations improve comfort and breathability

REQUIRED MEASUREMENTS

- Shoe size
