## Unloader One® X

The [Unloader One X](#), may help improve mobility by generating unicompartmental unloading of the knee joint for people with knee osteoarthritis and degenerative meniscal tears while being worn.

Multiple peer-reviewed clinical and bio-mechanical studies have investigated Össur's unique 3-Point Leverage System and Dynamic Force Straps, which are easily fine-tuned using the SmartDosing® system, to provide unloading of the knee joint.

## Tracey's Experience with the Unloader One® X

Tracey Kamen has recently become a user of the Unloader One X knee brace, which has had a significant impact on her life. Before her accident, Tracey was an active and competitive individual, deeply involved in various sports.

However, due to knee pain, Tracey experienced a decline in leg strength and was limited to walking at a slow pace for only 30 minutes. In search of a solution, she discovered the Unloader One X. This knee brace has proven to be life-changing for Tracey, empowering her to regain her mobility and pursue her life without limitations.

*"The Unloader One X lets me travel again. One of my passions along with sport is travelling. I particularly like to go to out-of-the-way places and enjoy nature, but without being able to walk far and get off the beaten track. My friends have all commented on how much happier I seem as well as I get to go out and spend more time with them. Previously I would have to decline their invitations, or they would have to alter their plans to make the activities within the scope of what I could do."*

- Tracey

## Share Your Experience: How likely are you to recommend us?

You would have recently received a very short Net Promoter Score (NPS) survey question via email. This is part of a global initiative aimed at helping us identify gaps in our customer experience and improve our customer relationships. Your responses are highly appreciated, so please remember to complete this brief survey if you haven't done so already.

**How likely are you to recommend us to a friend or colleague?**
