FOOT AND ADAPTER CHARACTERISTICS

WEATHERPROOF

A weatherproof device allows use in a wet and/or humid environment but does not allow submersion. Fresh water splashing against the enclosure from any direction shall have no harmful effect. Dry thoroughly after contact with fresh water. Fresh water: Includes tap water. Excludes salt and chlorinated water.

FRESH WATERPROOF*

* The use of first-rate materials provides permanent protection against harmful ingress of fresh water. Even after submersion in fresh water, the parts maintain their integrity and continue to provide the functionality you expect.

WATERPROOF

Whether it's fresh water, salt water or chlorinated water, Waterproof Össur products will give you the maximum protection you need. The use of first-rate materials provides permanent protection against harmful ingress of water, even after submersion, whilst continuing to provide the functionality you expect.
