6 🚺 Connect with Proprio Foot

Össur Logic will search for all the devices in range. Select your Proprio Foot Serial Number starting with HF (also shown on side of foot). It will then prompt you for a pairing code to connect to the foot.

7 \Lambda Insert 'pairing code'

This can be found on the back of the foot an example is shown in the image on the right.

8 Ready for use

- A Battery level
- B Assign shoe profiles here
- Tap here to connect and disconnect
- D Step count / usage information

Adjusting Heel Height

Put prosthesis in shoe in an upright position. Select cog image followed by Ankle Alignment.

Nate March 1000 Provide State Image: State</t

Select 'Ankle Alignment'

A Select 'automatic ankle alignment'. Then wait for the foot to adjust to the new heel height

B After it has adjusted, you can also manually adjust the alignment with the slider.

Alternatively, you can press the button on the front of the foot twice, in quick succession. Only when the device has beeped for the third time, is the heel height aligned.

Chair Exit / Relax Mode and Standby mode

Chair exit and relax mode can be switched on and off here

Use standby mode to eliminate all foot movement, e.g. when driving

How to store shoes on the app

Select the button shown on the right.

Select 'Create profile'

This will enable you to store previous alignments of footwear for easy access and adjustment, whenever you change your shoes.

- A Take a picture of the shoe (or barefoot)
- B Add name and details for shoe profile
- Click on 'Store profile'

Battery Life

To check battery life using the front button, push it once and each green light is equal to 10% of battery
