Unloader One® X Fitting Tips

Össur Academy has created an extensive video guide featuring step-by-step instructions for essential Unloader One X adjustments and maintenance.

Discover how to correctly position the hinge, fine-tune calf and thigh strap tensions, and reposition the popliteal pad for optimal comfort. The videos also include guidance on installing the ease of use kit and offer thorough cleaning instructions for both hand and machine washing.

Enhancing Patient Outcomes: Unloader One® X Brace

"I have been really happy with the advice and support from Össur. I had a patient with severe knee pain see me for physiotherapy. He saw the orthopaedic surgeon and said the brace would be worth trying.

It allowed him to work and manage the significant pain in his knee while he waits for a TKR. He found the brace comfortable and noticed that his pain is a lot more manageable when he wears it for work/doing things around his home.

After this experience, I am more likely to recommend and trial braces with my patients. The brace is an amazing product!"

FIOR & GENTZ NEURO SWING Range

Which is best for my patient?

The NEURO SWING range assists smooth physiological walking for those with lower limb strength deficits. Each style of joint has interchangeable springs and an adjustable shank to vertical alignment. This guide will help you choose the best NEURO SWING joint for your patient:

- **NEURO SWING:** This original joint features 5 spring stiffnesses and allows adjustments for plantarflexion, dorsiflexion, shank to vertical alignment, and RoM. It is also slightly smaller.

- **NEURO SWING CARBON:** It is waterproof, dirt-proof, and dust-proof, with fully sealed spring units that prevent debris entry. The carbon range has adjustment in resistance via the 5 different spring units however doesn't have the adjustable RoM control via the top cap.
- **NEURO SWING 2:** This joint has integrated noise reduction and is therefore the ideal choice for people who appreciate silent locomotion. It functions like the NeuroSwing but has a slightly taller spring housing due to the sound dampening mechanism.

Please note that the FIOR & GENTZ [Orthosis Configurator](#) defaults to NEURO SWING. This is a system quirk; all options are equally valid. Select based on client needs.

Introducing Carel Prinsloo!

WA & SA Territory Sales Manager

This month, we are thrilled to welcome Carel as the latest member of the Össur team. Carel will be joining our clinical sales team in Perth and will also support our customers in South Australia. Originally from South Africa, Carel is an Orthotist and Prosthetist who has worked extensively in both public and private healthcare environments. We are excited to have him on board and look forward to the valuable contributions he will bring to our team!

Share Your Experience: How likely are you to recommend us?

You would have recently received a very short Net Promoter Score (NPS) survey question via email. This is part of a global initiative aimed at helping us identify gaps in our customer experience and improve our customer relationships. Your responses are highly appreciated, so please remember to complete this brief survey if you haven't done so already.

How likely are you to recommend us to a friend or colleague?
