

## Formfit Walker Range Upgrade

Enhanced Design Now Rolling Out

We're pleased to share an update to the Formfit Walker and Formfit Air Walker range across standard height and low top versions.

An upgraded version is being rolled out in phases, so you may receive a mix of versions. We're excited to bring this improved version to market and appreciate your continued support as we manage this seamless transition.

This enhancement builds on the performance and reliability you and your customers already expect, while maintaining the same trusted design and functionality.

### Key product enhancements

#### Lightweight Design

- 25% lighter than the previous model
- Closer weight to normal footwear

#### Shock-Absorbing EVA Insole

- Reduced impact at heel strike

#### Minimal Heel Height

- Minimal heel height reduces leg length discrepancy
- Helps avoid unnecessary shoe modifications on the uninjured foot

#### Liner Update

- Black internal liner for a cleaner clinical appearance

**Important Note: There are no changes to product codes, pricing, or ordering processes, so no updates are required to your internal systems.**

If you have questions or would like to discuss the update in more detail, please contact your local clinical specialist.
