

SmartMeasure3D

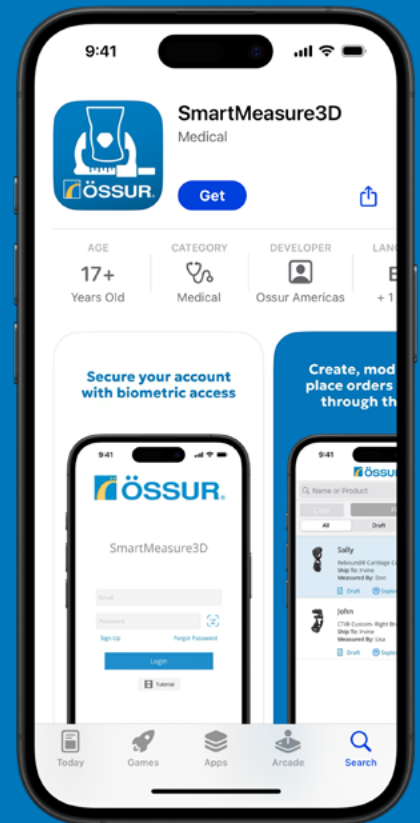

Össur's SmartMeasure3D is a digital measuring and ordering system for custom Össur knee braces. SmartMeasure3D allows you to quickly and easily scan your patient's knee, customize their brace, and place the order all in one app - no plaster cast or paper form required.

Truly 3D

Create real 3D scans of your patient using a variety of compatible scanners - including the TrueDepth® camera on your iPhone® or iPad®.

Truly Custom

Össur's truly custom bracing allows you to select from a variety of brace adjustments, configurations, and add-ons to make each brace truly custom for your patient.

Features

Secure your account with biometric access

Create, modify, and place orders directly through the app

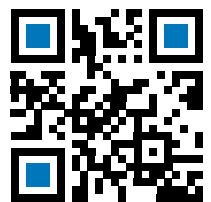

Select and customise your product with options and accessories

Enter patient measurements and upload images and scans

Create 3D scans with your camera or compatible Structure Sensor

Click or scan
to get the app
